

CONTENTS

1. INTRODUCTION	1
2. THEORY	3
3. EQUIPMENT	11
Primary Source of Radiation	12
Atomic Vapour Production	24
Optical Systems	31
Wavelength Selector	32
Radiation Detection, and Read-out	33
Use of Sources of Continuous Radiation	35
Resonance Monochromators	37
4. SOURCES OF INTERFERENCE	38
Atomization	38
Formation of Particles and Their Vaporization	41
Variations of Flame Parameters	48
Ionization Effects	50
Measurement of Absorption	52
5. COMPARISON WITH OTHER ANALYTICAL PROCEDURES	54
Comparison with Flame Photometry	54
Comparison with Methods other than Flame Photometry	59
6. METHODS-SCOPE AND DEVELOPMENT	63
Lamp	66
Absorption Line	66
Lamp Current	67
Atomizer and Flame	67
Monochromator Slit Width	67
Calibration Graph	68
Interferences	68
Application of Method	70
7. APPLICATIONS	71
Introduction	71
Method 1-Using a Calibration Graph	72
Method 2-Method of Standard Additions	74
Determination of :	76
REFERENCES TO CHAPTERS 1 TO 6 (INCLUSIVE)	132
INDEX	135
COMMERCIALY AVAILABLE EQUIPMENT-Tabulated insert	139
OTHER TITLES IN THE SERIES	140
