

CONTENTS

1. Introduction	1
2. Spectral Theory	3
3. Absorption in the Visible Region	12
4. Absorption in the Ultraviolet Region	49
5. Absorption in the Infrared Region	63
6. Raman Spectroscopy	96
7. Fluorometric Methods	113
8. Apparatus for Emission Spectroscopy	123
9. Qualitative Emission Spectroscopy	163
10. Quantitative Spectrographic Analysis	174
11. Flame Photometry	190
12. Colorimetric pH Measurement	201
13. Electrode Potential and pH Measurements	219
14. Potentiometric Titrations	237
15. Conductance Measurement	254
16. Polarography	268
17. Amperometric Titrations	286
18. High-Frequency Methods	292
19. X-Ray Analysis	302
20. Mass Spectrometry	328
21. Nuclear-Radiation Measurements	351
22. Laboratory Experiments	379
Appendix	411
Index	432
