

## CONTENTS

### **PART I. INTRODUCTION**

Chapter 1. General Considerations	1
Chapter 2. General Directions for Laboratory Work	13
Chapter 3. Common Analytical Operations	21
Chapter 4. The Analytical Balance	45
Chapter 5. The Precision of Analytical Measurements	72
Chapter 6. Review of Some Basic Principles	88

### **PART II. VOLUMETRIC ANALYSIS**

Chapter 7. General Directions for Volumetric Work	117
Chapter 8. Neutralization Titration Curves	135
Chapter 9. Acidimetry and Alkalimetry	153
Chapter 10. Oxidation-Reduction (Redox) Processes	191
Chapter 11. Oxidation-Reduction (Redox) Titrations	204
Chapter 12. Permanganate Process	211
Chapter 13. Dichromate and Ceric Processes	240
Chapter 14. Iodimetry and Related Methods	260
Chapter 15. Precipitation Methods (“Precipitometry”)	285
Chapter 16. Complex Formulation Methods (“Compleximetry”)	298

### **PART III. GRAVIMETRIC ANALYSIS**

Chapter 17. General Principles of Gravimetric Analysis	307
Chapter 18. Analysis of Soluble Salts	343
Chapter 19. Analysis of an Ore	360

### **PART IV. INSTRUMENTAL METHODS**

Chapter 20. Electrometric Methods	389
Chapter 21. Optical Methods	437
Chapter 22. Gas-Volumetric Methods	454

### **PART V. MISCELLANEOUS DETERMINATIONS**

Chapter 23. Miscellaneous Determinations	463
--	-----

### **PART VI. ANSWERS TO PROBLEMS** **539**

Appendix	545
Index	567
