

## CONTENTS

Chapter 1	Introduction	1
Chapter 2	Errors in Chemical Analyses	11
Chapter 3	Random Errors in Analyses	21
Chapter 4	Application of Statistics to Data Treatment and Evaluation	47
Chapter 5	Gravimetric Methods of Analysis	71
Chapter 6	Titrimetric Methods of Analysis	100
Chapter 7	Aqueous-Solution Chemistry	122
Chapter 8	Effects of Electrolytes on Ionic Equilibria	148
Chapter 9	Application of Equilibrium Calculations to Complex Systems	159
Chapter 10	Theory of Neutralization Titrations	189
Chapter 11	Titration Curves for Complex Acid/Base Systems	224
Chapter 12	Applications of Neutralization Titrations	248
Chapter 13	Precipitation Titrimetry	266
Chapter 14	Complex-Formation Titrations	278
Chapter 15	An Introduction to Electrochemistry	303
Chapter 16	Applications of Standard Electrode Potentials	330
Chapter 17	Applications of Oxidation/Reduction Titrations	360
Chapter 18	Theory of Potentiometry	386
Chapter 19	Applications of Potentiometry	412
Chapter 20	Electrogravimetric and Coulometric Methods	431
Chapter 21	Voltammetry	460
Chapter 22	An Introduction to Spectrochemical Methods	497
Chapter 23	Instruments for Optical Spectrometry	527
Chapter 24	Molecular Absorption Spectroscopy	557
Chapter 25	Molecular Fluorescence Spectroscopy	601
Chapter 26	Atomic Spectroscopy Based on Ultraviolet and Visible Radiation	611
Chapter 27	Kinetic Methods of Analysis	637
Chapter 28	An Introduction to Chromatographic Methods	660
Chapter 29	Gas-Liquid Chromatography	686
Chapter 30	High-Performance Liquid Chromatography	701
Chapter 31	The Analysis of Real Samples	725
Chapter 32	Preparing Samples for Analysis	736
Chapter 33	Decomposing and Dissolving the Sample	749
Chapter 34	Eliminating Interferences	760
Chapter 35	The Chemicals, Apparatus, and Unit Operations of Analytical Chemistry	778
Chapter 36	Selected Methods of Analysis	812

Glossary	G-1
Appendix 1 Selected References to the Literature of Analytical Chemistry	A-1
Appendix 2 Solubility Product Constants	A-6
Appendix 3 Dissociation Constants for Acids	A-8
Appendix 4 Stepwise Formation Constants	A-10
Appendix 5 Some Standard and Formal Electrode Potentials	A-12
Appendix 6 Designations Carried by Ashless Filter Papers	A-16
Appendix 7 Designations and Porosities for Filtering Crucibles	A-17
Appendix 8 Use of Exponential Numbers and Logarithms	A-18
Appendix 9 Volumetric Calculations Using Normality and Equivalent Weight	A-23
Appendix 10 Compounds Recommended for the Preparation of Standard Solutions of Common Elements	A-32
Appendix 11 Propagation of Measurements Uncertainties	A-34
Answers to Selected Questions and Problems	A-40
Index	I-1
