

## CONTENTS

|                    |   |     |
|--------------------|---|-----|
| <b>CHAPTER I</b>   | THE THEORETICAL BASIS OF QUANTITATIVE INORGANIC ANALYSIS                                  | 1   |
|                    | VOLUMETRIC (TITRIMETRIC) ANALYSIS   | 38  |
|                    | THEORY OF ACID-BASE TITRATIONS  | 51  |
|                    | THEORY OF PRECIPITATION AND COMPLEX FORMATION PROCESSES                                   | 72  |
|                    | THEORY OF OXIDATION-REDUCTION REACTIONS   | 83  |
|                    | THEORY OF GRAVIMETRIC ANALYSIS  | 104 |
| <b>CHAPTER II</b>  | EXPERIMENTAL TECHNIQUE OF QUANTITATIVE INORGANIC ANALYSIS                                 | 140 |
|                    | GENERAL APPARATUS, REAGENTS, AND OPERATIONS   | 169 |
|                    | TECHNIQUE OF VOLUMETRIC (TITRIMETRIC) ANALYSIS  | 191 |
|                    | TECHNIQUE OF GRAVIMETRIC ANALYSIS   | 211 |
|                    | MISCELLANEOUS OPERATIONS  | 227 |
| <b>CHAPTER III</b> | VOLUMETRIC (TITRIMETRIC) ANALYSIS AQUEOUS ACID-BASE TITRATIONS ACIDIMETRY AND ALKALIMETRY | 233 |
|                    | PRECIPITATION TITRATIONS  | 258 |
|                    | OXIDATION-REDUCTION TITRATIONS. OXIDIMETRY AND REDUCTIMETRY                               | 277 |
|                    | OXIDATIONS WITH POTASSIUM PERMANGANATE  | 277 |
|                    | OXIDATIONS WITH POTASSIUM DICHROMATE  | 304 |
|                    | OXIDATIONS WITH CERIC SULPHATE  | 314 |
|                    | OXIDATIONS WITH MANGANIC SULPHATE   | 327 |
|                    | REDUCTIONS WITH TITANOUS SALTS  | 329 |
|                    | REDUCTIONS WITH AMALGAMATED ZINC AND WITH LIQUID AMALGAMS                                 | 332 |
|                    | OXIDATION AND REDUCTION PROCESSES INVOLVING IODINE- IODIMETRY AND IODOMETRY               | 343 |
|                    | OXIDATIONS WITH POTASSIUM IODATE  | 374 |
|                    | OXIDATIONS WITH POTASSIUM BROMATE   | 383 |
|                    | OXIDATIONS WITH CHLORAMINE-T  | 392 |
|                    | OXIDATIONS WITH SODIUM HYPOCHLORITE   | 395 |
|                    | REDUCTIONS WITH MERCUROUS NITRATE   | 398 |
|                    | MISCELLANEOUS VOLUMETRIC (TITRIMETRIC) DETERMINATIONS                                     | 401 |
| <b>CHAPTER IV</b>  | COMPLEXOMETRIC (LARGELY EDTA) TITRATIONS  | 415 |

|                     |   |     |
|---------------------|---|-----|
| <b>CHAPTER V</b>    | <b>GRAVIMETRIC ANALYSIS</b>   | 458 |
|                     | SIMPLE GRAVIMETRIC DETERMINATIONS                                       | 459 |
|                     | SYSTEMATIC GRAVIMETRIC ANALYSIS   | 481 |
| <b>CHAPTER VI</b>   | <b>ELECTRO-GRAVIMETRIC ANALYSIS</b>                                     | 588 |
|                     | ELECTROLYTIC DETERMINATIONS AT CONSTANT CURRENT                         | 601 |
|                     | ELECTROLYTIC DETERMINATIONS WITH CONTROLLED<br>POTENTIAL AT THE CATHODE | 618 |
| <b>CHAPTER VII</b>  | <b>ANALYSES OF COMPLEX MATERIALS</b>                                    | 628 |
| <b>CHAPTER VIII</b> | <b>COULOMETRIC ANALYSIS</b>   | 668 |
|                     | COULOMETRY AT CONSTANT CURRENT. COULOMETRIC<br>TITRATIONS               | 676 |
|                     | ELECTROLYTICALLY GENERATED IODINE                                       | 687 |
|                     | ELECTROLYTICALLY GENERATED BROMINE                                      | 688 |
|                     | ELECTROLYTICALLY GENERATED FERROUS ION                                  | 689 |
|                     | ELECTROLYTICALLY GENERATED CERIC ION                                    | 691 |
|                     | ELECTROLYTICALLY GENERATED MERCUROUS ION                                | 692 |
|                     | ELECTROLYTICALLY GENERATED SILVER ION                                   | 694 |
|                     | ELECTROLYTICALLY GENERATED FERRICYANIDE ION                             | 695 |
|                     | ELECTROLYTICALLY GENERATED FERROCYANIDE ION                             | 696 |
|                     | ELECTROLYTICALLY GENERATED HYDROXIDE ION                                | 697 |
|                     | ELECTROLYTICALLY GENERATED HYDROGEN ION                                 | 700 |
| <b>CHAPTER IX</b>   | <b>ION EXCHANGE AND CHROMATOGRAPHIC METHODS IN ANALYSIS</b>             |     |
|                     | ION-EXCHANGE METHODS  | 702 |
|                     | SIMPLE APPLICATIONS IN ANALYTICAL CHEMISTRY                             | 714 |
|                     | CHROMATOGRAPHIC METHODS   | 724 |
| <b>CHAPTER X</b>    | <b>COLORIMETRIC AND SPECTROPHOTOMETRIC ANALYSIS</b>                     | 738 |
|                     | EXPERIMENTS WITH ULTRA-VIOLET AND VISIBLE<br>SPECTROPHOTOMETERS         | 813 |
|                     | SPECTROPHOTOMETRIC TITRATIONS   | 821 |
|                     | INFRA-RED SPECTROPHOTOMETRY   | 826 |
| <b>CHAPTER XI</b>   | <b>FLUORIMETRIC ANALYSIS</b>  | 838 |
| <b>CHAPTER XII</b>  | <b>NEPHELOMETRIC AND TURBIDIMETRIC ANALYSIS</b>                         | 847 |
| <b>CHAPTER XIII</b> | <b>EMISSION SPECTROGRAPHIC ANALYSIS</b>                                 | 854 |

|                      |   |             |
|----------------------|---|-------------|
| <b>CHAPTER XIV</b>   | <b>FLAME PHOTOMETRIC ANALYSIS</b>   | <b>879</b>  |
| <b>CHAPTER XV</b>    | <b>SOLVENT EXTRACTION METHODS IN ANALYSIS LIQUID-LIQUID SYSTEMS</b>                 | <b>890</b>  |
|                      | <b>SOME SIMPLE APPLICATIONS</b>   | <b>897</b>  |
|                      | <b>SOLID-LIQUID SYSTEMS</b>   | <b>904</b>  |
| <b>CHAPTER XVI</b>   | <b>POTENTIOMETRIC TITRATIONS</b>  | <b>908</b>  |
| <b>CHAPTER XVII</b>  | <b>CONDUCTOMETRIC TITRATIONS</b>  | <b>969</b>  |
| <b>CHAPTER XVIII</b> | <b>HIGH-FREQUENCY TITRATIONS</b>  | <b>988</b>  |
| <b>CHAPTER XIX</b>   | <b>POLAROGRAPHIC ANALYSIS</b>   | <b>1000</b> |
| <b>CHAPTER XX</b>    | <b>AMPEROMETRIC TITRATIONS</b>  | <b>1035</b> |
|                      | <b>TITRATIONS WITH THE ROTATING PLATINUM MICROELECTRODE</b>                         | <b>1048</b> |
|                      | <b>AMPEROMETRIC TITRATION WITH TWO INDICATOR ELECTRODES (“DEAD-STOP END POINT”)</b> | <b>1051</b> |
| <b>CHAPTER XXI</b>   | <b>GAS ANALYSIS</b>   | <b>1054</b> |
|                      | <b>GAS-VOLUMETRIC METHODS OF ANALYSIS FOR SOLIDS AND LIQUIDS</b>                    | <b>1088</b> |
| <b>CHAPTER XXII</b>  | <b>MICRO-GRAVIMETRIC AND MICRO-VOLUMETRIC (TITRIMETRIC) ANALYSIS</b>                | <b>1094</b> |
| <b>CHAPTER XXIII</b> | <b>ERRORS IN QUANTITATIVE ANALYSIS</b>  | <b>1121</b> |
| <b>APPENDIX</b>      |   | <b>1131</b> |
