CONTENTS

I. Introduction.....	2
II. Nomenclature.....	3
III. Structure and Mechanism.....	3
IV. The Ammonolysis and Aminolysis of Halogenophosphoranes.....	9
A. Chlorophosphazenes.....	9
B. Separation of Chlorocyclophosphazenes.....	14
C. Bromophosphazenes.....	16
D. Alkyl- and Aryl-Phosphazenes.....	17
E. Aminolysis of Halogenophosphoranes.....	21
F. Preparations.....	24
V. Synthesis of Phosphazenes from Azides.....	27
A. Preparation.....	30
VI. Miscellaneous Phosphazene Syntheses.....	31
VII. Aminophosphazenes (Phosphonitrilic Amides) and Their Reactions.....	32
A. Ammonolysis and Aminolysis Reactions of Halogenophosphazenes.....	32
1. General.....	32
2. Reactions with Ammonia.....	35
3. Reactions with Primary Amines.....	36
4. Reactions with Secondary Amines.....	37
5. Reactions with Tertiary Amines.....	40
6. Kinetic and Reactivity Studies.....	40
7. Structural Investigations.....	41
B. Reactions of Amino- and Aminochloro-Phosphazenes.....	42
C. Preparations.....	45
VIII. The Alcoholysis of Chlorophosphazenes.....	49
A. General.....	49
B. Experimental Techniques.....	54
C. Preparations.....	55
IX. Alkoxyoxocyclophosphazanes.....	57
A. General.....	57
B. Preparation.....	60
X. Hydrolysis of Chlorophosphazenes—Hydroxyoxocyclophosphazanes and Their Salts (Metaphosphimic Acids and Metaphosphimates).....	60
A. General.....	60
B. Preparations.....	63

XI. Thioalcoholysis of Chlorophosphazenes	64
A. General.	64
B. Experimental Techniques.	67
C. Preparations.	68
XII. Replacement of Chlorine Atoms in Chlorocyclophosphazenes by Halide or Pseudohalide Ions.	69
A. Halogen-Exchange Reactions.	69
B. Reactions of Chlorophosphazenes with Pseudohalides.	71
C. Preparations.	72
XIII. Friedel-Crafts Reactions.	74
A. General.	74
B. Preparation.	77
XIV. Reactions with Organometallic Reagents.	77
A. General.	77
B. Preparation.	79
XV. Miscellaneous Phosphazene Reactions.	80
XVI. High Polymers.	81
XVII. Concluding Remarks.	84
Acknowledgments.	84
