

CONTENTS

SECTION I : PROCESSES IN NATURAL WATERS

The Surface Chemistry of Humic Substances in Aquatic Systems	3
Microbial Processes Occurring at Surfaces	21
Photochemistry of Colloids and Surfaces in Natural Waters and Water Treatment	27
Kinetics and Mechanisms of Iron Colloid Aggregation in Estuaries	45
The Generation of Suspended Sediment in Rivers and Streams	57
Application of the Uranium Decay Series to a Study of Ground Water Colloids	71

SECTION II : WATER TREATMENT PROCESSES

Water Treatment Technology in Australia	87
The Role of Surface and Colloid Chemistry in the SIROFLOC Process	103
Coagulation and Flocculation-Destabilizing Practices? (With Particular Reference to Metal Ion Coagulants)	119
Enhanced Biological Removal of Phosphorus from Wastewater	135
Some Effects of Dam Destratification upon Manganese Speciation Contributors	143
	153
Index	155
