

CONTENTS

Introduction	1
Systems of Alkali and Alkaline Earth Metals	3
Multicomponent Alkali-Metal Alloys	23
Physical and Chemical Properties of Dilute Alloys of Cadmium in Sodium	32
Non-metallic Containment Materials for Alkali Metals and their Compounds	45
The Viscosity of the Alkali Metal Vapours. Part I. Caesium up to 5 bars and 1000°C	53
High Temperature Properties of Alkali-Metal Vapours	75
Latent Heat of Vaporization of Potassium: its Experimental Determination	82
Intermetallic Compounds and Alloys of the Alkali Metals	92
Molten Salt-Metal Solutions, Particularly of the Alkali Metals	114
A Correlation of Infrared Shift with Odd-Electron Density in Aromatic Anion-Radicals	116
Applications of E.S.R. Spectroscopy to the Study of Complexes of Alkali-metal Cations and Aromatic Radical-anions	125
Reactions of Alkali Metals in Flames	130
Quenching of Excited Alkali Metal Atoms in Flames	131
Alkali-metal Ions and their Monohydrates in the Gas Phase	139
The Wetting of Solid Metals by Liquid Alkali Metals	147
The Wetting Behaviour of some Alloys Based on Iron, Nickel, and Chromium in Liquid Sodium	153
Influence of Water Content of Oxygen on the Kinetics of Sodium and Potassium Oxidation	167
Lithium and its Binary Compounds	183
⁷ Li Nuclear Magnetic Resonance Studies of the Solvation of Lithium Ions	199
New Binary Compounds of the Alkali Metals with Boron, Silicon, and Germanium	207
Preparation and Handling of Solutions of Sodium in Liquid Ammonia	222
A Relation between Ultrasonic Absorption, Adiabatic Compressibility, and Proton Spin-Lattice Relaxation for Aqueous Solutions of Alkali-metal and Magnesium Salts	231
Application of Sodium Chemistry in Fast Reactors	236
Reaction of Carbon Monoxide with Sodium	260
The Reaction between Acetylene and Molten Sodium	270
The Reaction between Alkali Metals and Water	277
Ultrasonically Dispersed Sodium	284
The Liquid Alkali Metals as Reaction Media	290
The Chemical Properties of Heavy Alkali Metals inserted in Graphite; Reactions with some Gaseous Elements	309
Preparation of Pure Alkali Metals	317
Recent Developments in the Preparation of Potassium, Rubidium, and Caesium	370
Experimental Techniques for the Purification of Sodium	374

Methods for the Analysis of Oxygen, Hydrogen, and carbon in Sodium	393
Determination of the Solubility of Oxygen in Sodium using the Vacuum Distillation Analytical Technique	401
A Technique for Calibration of Electrochemical Oxygen Meters in Potassium	403
The 12-Molybdophosphates of the Alkali Metals	416
Activation Analysis of Potassium and Sodium, and their Behaviour on Cation Exchange Resin	424
Solid State Studies of Alkali Metals in Transition-Metal Oxides	429
On Ternary Oxides of Alkali Metals "Rich in Cations"	452
The Reactions of Liquid Sodium and Liquid Potassium with Niobium Pentoxide	460
Action of Alkali Metal Vapours on the Trioxides of Molybdenum and Tungsten	465
The Lithium and Sodium Silicates	474
Comparative Study of Methods of Preparation of Ternary Oxides of Potassium with Elements in the 4+ Oxidation State	483
