

CONTENTS

Theory of Macroscopic Atomic Transport

1.1 Phenomenological law and Non-equilibrium Thermodynamics	2
1.2 Distribution Functions and the Liouville Equation	15
1.3 Time Correlation Functions and Memory Functions	22
1.4 Theory for Transport Coefficients of Liquid Metals	35
1.5 Theory for Transport Coefficients of Liquid Alloys	62
1.6 General Remarks	92
1.7 References	95

Theory of Microscopic Atomic Transport

2.1 Space-Time Correlation in Dynamic Processes	103
2.2 Nuclear Quadrupolar Relaxation	135
2.3 General Remarks	146
2.4 References	148

Experimental Methods and Results

3.1 Diffusion	154
3.2 Shear Viscosity	183
3.3 Ultrasonic Attenuation and Bulk Viscosity	208
3.4 Electrotransport	216
3.5 Thermal Diffusion	220
3.6 Neutron Inelastic Scattering	223
3.7 Nuclear Quadrupolar Relaxation (NQR)	231
3.8 “Computer Experiment” (Molecular Dynamics Technique)	248
3.9 References	258

Appendix Bibliography for experimental studies	271
