CONTENTS

Chapter I:	**GENERAL INFORMATION ON PLATINUM METALS**	**1**
	Position in the periodic system of elements	1
	Stable and radioactive isotopes	4
	Natural occurrence of the platinum metals. Minerals and ores	6
	Natural and industrial objects of chemical analysis	10
Chapter II:	**CHEMICO-ANALYTICAL CHARACTERISTICS OF THE ELMENTS AND**	
	THEIR COMPOUNDS	12
	Physical properties of the platinum metals	12
	Behavior of the platinum metals in acids, bases, halogens, and other reagents.	
	Dissolving techniques	14
	Redox reactions in hydrochloric, sulfuric and perchloric acids and alkaline	
	solutions	22
	Major chemical compounds used in analysis	41
Chapter III:	**QUALITATIVE ANALYSIS OF PLATINUM METALS**	**154**
	Ruthenium	155
	Osmium	157
	Rhodium	158
	Iridium	159
	Palladium	160
	Platinum	163
Chapter IV:	**DETERMINATION OF PLATINUM METALS**	**167**
	Gravimetric methods	167
	Titrimetric methods	216
	Spectrophotometric methods	252
	Fluorimetric methods	344
	Spectroscopy	346
	Electrochemical methods	370
	Radioactivation methods	404
	Kinetic methods	407

Chapter V: SEPARATION METHODS FOR THE PLATINUM METALS 413
Separation methods based on distillation 414
Methods for the separation of palladium, platinum, rhodium, and iridium based on precipitation reactions 421
Extraction methods 434
Ion exchange chromatography in a column 456
Chromatography 466

Chapter VI: CONCENTRATION OF THE PLATINUM METALS AND THEIR SEPARATION FROM ASSOCIATED ELEMENTS 488
Assay enrichment 489
Chemical and physiochemical concentrating methods 496

Chapter VII: ANALYSIS OF NATURAL AND INDUSTRIAL OBJECTS CONTAINING PLATINUM METALS. ANALYSIS OF PURE METALS 515
Analytical methods for copper-nickel sulfide ores, meteorites, minerals and other "lean" natural and industrial objects containing micro and submicro amounts of platinum metals 515
Analytical methods for "rich" industrial materials, platinum concentrates, alluvial platinum and certain minerals of the platinum metals 549
Analysis of pure metals 563
