

## CONTENTS

1. Chemistry of Areneboronic Acids with Neighboring Amine Groups	1
2. Reactions of Triphenylphosphinimines with Boron Compounds, Certain Organometals, and Lewis Acids	17
3. Relations between Structure and Coordination Stability in Boroxazolidines	23
4. Kinetics of the Gas-Phase Association of Donors and Acceptors Mechanism of the Reaction between $B_2H_6$ and $NMe_3$	35
5. The Solvolysis of Amineboranes	53
6. Vibrational Frequencies, Assignments, and Force Constants for Some Compounds Containing Boron-Nitrogen Dative Bonds	59
7. Vibration Spectra and Structural Problems of Some Amino-boranes	71
8. Theoretical Investigations on Boron-Nitrogen Molecules	78
9. The Force Constants of Various Boron- Nitrogen Compounds	87
10. LCAO-MO Calculations on Boron Compounds. I. Aminoboranes	95
11. Proton Magnetic Resonance Study of Bonding in Aminoboranes and Substituted Pyridine-Boranes	100
12. Proton Magnetic Resonance of Aminoborane Derivatives	108
13. Preparation and Structure of Tris(dialkylboryl 1-2-pyridylamino) borane	116
14. Hydrolyses of Some Boron-Nitrogen Derivatives	131
15. Reaction of Trimethylamine with $H_2AlBH_4$ . $N(CH_3)_3$	139
16. Boron Compounds. VI. New Compounds with Boron-Nitrogen Bonds	148
17. Contributions to the Chemistry of Boron. XXIV. Preparation and Properties of Some Hydrazinoboranes	166
18. Reaction of Nitric Oxide with Tri- <i>n</i> -butylborane	183
19. Amination of Borate Esters with Diamines	192
20. Some Reactions of Dialkylaminoborons	201
21. Cyclic Boron Compounds. VI. A BN-Substituted Cyclobutadiene Analog. Synthesis Structure, Stereochemistry, and Mechanism of Formation	208
22. Cyclic Boron Compounds. VII. Cyclic Boroureas and Borocar-bamates	220
23. Heteroaromatic Boron Compounds	227
24. LCAO-MO Calculations on Boron Compounds. II. Borazines	251
25. Synthesis of <i>B</i> -organofunctional Borazine Derivatives. A Review of Recent Work at the Massachusetts Institute of Technology	259
26. Chemistry of <i>B</i> -Fluorinated Borazines	266
27. LCAO-MO Calculations on Boron Compounds. III. Heteroaromatic Boron Compounds	273
28. The Formation and Behavior of Polycyclic Borazines	281
29. A New Boron-Nitrogen Ring System. The Tetrameric Borazynes	290
30. The Vibration Spectra and Structure of Some Tetrameric Borazynes	301
31. Amine Addition Compounds of $H_3BCO$ and $B_4H_8CO$	302
32. Boron-Nitrogen Bonds in the Higher Boranes	312
Index	323
