

Contents of Volume 1

Introduction to the Series v
Preface to Volume 1 vii
Contributors to Volume 1 ix
Contents of Volume 2 xv

Chapter One: Dislocations and Stacking Faults in Graphite

S. AMELINCKX, P. DELAVIGNETTE, AND M. HEERSCHAP

I. Introduction 2
 II. Structural Considerations 3
 III. Dislocations 6
 IV. Observation Methods 14
 V. Ribbons 18
 VI. Dislocation Reactions 28
 VII. Star Pattern 39
 VIII. Subboundaries 41
 IX. Twinning 43
 X. Dislocation Loops in Quenched Graphite 45
 XI. Dislocation **Loops** in Neutron Irradiated Graphite 48
 XII. Interaction Between Dislocation Loops 50
 XIII. The Interaction of Glissile Dislocations and Loops 56
 XIV. Boundary Dislocations: Definition 59
 XV. Reactions Between Boundary Dislocations and Ordinary Ribbons 60
 XVI. Reactions Among **Boundary** Dislocations 63
 XVII. Widening of Ribbons Upon Intercalation 63
 XVIII. The Refraction Effect 65
 XIX. Surface Effects Associated With Ribbons 67
 Nomenclature 68
 References 69

Chapter Two: Gaseous Mass Transport Within Graphite

G. F. HEWITT

I. Introduction 74
 II. Modes of Flow in a Single Capillary 75
 III. Flow in Porous Media With Particular Reference to Graphite 91
 IV. Experimental Methods 103
 V. Experimental Results for Graphite and Their Relevance 109

Chapter Three: Microscopic Studies of Graphite Oxidation**J. M. THOMAS**

I. The Advantages of Optical Microscopy	122
II. Early Work Using Optical Microscopy	124
III. Practical Considerations	125
IV. The Uncatalyzed Oxidation of Graphite by Oxygen	135
V. The Origin of Etch Pits	156
VI. The Uncatalyzed Oxidation of Graphite by Other Gases	168
VII. Influence of Solid Catalysts on the Oxidation of Graphite	179
Nomenclature	198
References	198

Chapter Four: Reactions of Carbon With Carbon Dioxide and Steam**SABRI ERGUN AND MORRIS MENTSER**

I. Introduction	204
II. Literature Surveys	205
III. Conventional Approach to Gasification Kinetics	206
IV. Dynamic Oxygen Exchange Between CO_2 and CO Over Carbon	211
V. Reactions of Carbon Dioxide With Carbon and Coke	216
VI. Reactions of Steam With Coke	229
VII. Discussion of the Unified Theory	259
Nomenclature	261
References	261

Chapter Five: The Formation of Carbon from Gases**HOWARD B. PALMER AND CHARLES F. CULLIS**

I. Introduction	266
II. The Main Experimental Facts	267
III. Kinetics and Mechanism	295
IV. Unsolved Problems and Suggestions for Future Work	318
References	319

**Chapter Six: Oxygen Chemisorption Effects on Graphite
Thermoelectric Power****P. L. WALKER, JR., L. G. AUSTIN, AND J. J. TIETJEN**

I. Introduction	328
II. Review of Previous Thermoelectric Power Studies on Graphite and Carbons.	330
III. A Theory of the Thermoelectric Power of Graphite	334
IV. Effect of Oxygen Chemisorption on Thermoelectric Power of Graphite	342

CONTENTS

xiii

V. Kinetics of Oxygen Chemisorption on Graphite	351
VI. Summary	360
Nomenclature	361
References.	363
<i>Author Index</i>	367
<i>Subject Index</i>	377
