

## CONTENTS OF VOLUME 2

<i>Contents of Volume 1</i>	v
<i>Contributors to Volume 2</i>	vi
<i>Preface to Volume 8</i>	vii
<i>In Memoriam: G. R. Hennig</i>	ix
<b>Electron Microscopy of Reactivity Changes near</b>	
<b>Lattice Defects in Graphite</b>	
	1
G. R. HENNIG	
I. Introduction	2
II. Historical	3
III. Etch-Decoration Method	5
IV. Reaction at Defects	16
V. Reactivity of Graphite	29
VI. Catalyzed Reactions	38
VII. Catalysis and Lattice Defects	45
References	49
<b>Porous Structure and Adsorption Properties of Active Carbons</b>	
	51
M. M. DUBININ	
I. Introduction	51
II. Varieties of Pores of Active Carbons	52
III. Fundamentals of the Theory of Volume Filling of Micropores in Adsorption of Gases and Vapors by Active Carbons	59
IV. Determining Parameters of Porous Structure of Different Varieties of Pores	74
V. Adsorption Properties of Active Carbons	96
References	118
<b>Radiation Damage in Graphite</b>	
	121
W. N. REYNOLDS	
I. Introduction	121
II. The Damage Function	123
III. Properties of Point Defects	127
IV. Transmission Electron Microscopy	136

V. Nucleation Processes	141
VI. Dimensional Changes	153
VII. Thermal Annealing and Stored Energy	170
VIII. The Properties of Vacancies	176
IX. Mechanical Deformation	177
X. Other Properties	186
XI. Conclusions	189
References	190

## **Adsorption from Solution by Graphite Surfaces** 197

**A. C. ZETTMEOYER AND K. S. NARAYAN**

I. Introduction	197
II. Adsorption from Binary Mixtures	200
III. Adsorption from Dilute Solutions	211
IV. Surfactant Adsorption from Aqueous Solutions and Immersional Calorimetry	212
V. Summary	221
References	222

## **Electronic Transport in Pyrolytic Graphite and Boron Alloys of Pyrolytic Graphite** 225

**CLAUDE A. KLEIN**

I. Introduction	225
II. Layer-Plane Processes	227
III. c-Direction Processes	244
IV. Regarding the Anisotropy	248
V. Conclusion	255
References	256

## **Activated Diffusion of Gases in Molecular-Sieve Materials** 257

**P. L. WALKER, JR., L. G. AUSTIN, AND S. P. NANDI**

I. Introduction	257
II. Selected Review of the Literature on Molecular-Sieve Materials	262
III. Theory of Unsteady-State Diffusion in Molecular-Sieve Materials	288
IV. Experimental Diffusion Coefficients in Zeolites and Carbon Molecular Sieves	304
V. Theoretical Calculations of Activated Diffusion in Type A Zeolites	326

**CONTENTS**

xiii

VI. Theoretical Calculations of Potential Energies of Rare Gases Interacting with Carbon Surfaces	348
Appendix	362
References	367
<i>Author Index</i>	373
<i>Subject Index</i>	381
