

CONTENTS OF VOLUME 5

<i>Preface to Volume 5</i>	v
<i>Contributors to Volume 5</i>	vii
<i>Contents of Other Volumes</i>	xi
Deposition, Structure, and Properties of Pyrolytic Carbon	1
J. C. BOKROS	
I. Introduction	1
II. Mechanisms of Carbon Formation from Gaseous Hydrocarbons	3
III. Characterization of the Structure of Turbostratic Carbons	7
IV. Relation Between Structure of Pyrolytic Carbon and Deposition Conditions	23
V. Discussion of the Microstructures of Pyrolytic Carbon	52
VI. Relationship Between the Structure and Properties of Pyrolytic Carbon	70
VII. New Applications of Carbons Deposited in Fluid Beds	107
References	110
The Thermal Conductivity of Graphite	119
B. T. KELLY	
I. Introduction	119
II. Review of Thermal Conductivity Measurements	120
III. The Theory of the Thermal Conductivity of Graphite and Carbons	136
IV. Comparison of Theory and Experiment	191
V. Conclusions	209
Appendix	211
References	211
The Study of Defects in Graphite by Transmission Electron Microscopy	217
P. A. THROWER	
I. Introduction	217
II. Basic Techniques of Transmission Electron Microscopy	218
III. Defect Structures	228

IV. Materials Used	237
V. Defects Produced by Other Elements	251
VI. Quenched Defects	256
VII. Defects Produced by Irradiation	261
VIII. Thermal Annealing	282
IX. Point Defect Diffusion	290
X. Nucleation of Radiation Damage in Reactor Graphite	296
XI. Effect of Defects on Physical Properties	299
XII. Conclusions	310
XIII. Notes Added in Proof	311
Appendix	313
List of Symbols	313
References	315

Intercalation Isotherms on Natural and Pyrolytic Graphite 321

J. G. HOOLEY

I. Introduction	321
II. Experimental Determination of Isotherms	324
III. Bromine Isotherms	330
IV. Isotherms on Adducts Other than Bromine	344
V. Summary and Conjectural Comment	367
References	370
<i>Author Index</i>	373
<i>Subject Index</i>	384
