

CONTENTS

PREFACE	1
1. INTRODUCTION: ATOMIC PROPERTIES	4
2. THE SiH BOND	12
1. Formation	12
2. Physical properties	15
3. Chemical properties	26
3. THE HALIDES OF SILICON	48
1. Formation of silicon-halogen bonds	48
2. Preparation of halosilanes	48
3. Physical properties	50
4. Chemical properties	58
5. Halides of germanium (IV) and tin (IV)	68
4. COMPOUNDS CONTAINING SILICON BOUND TO ELEMENTS OF GROUP IV	76
1. The silicon-carbon bond	76
2. The silicon-silicon bond	85
5. COMPOUNDS CONTAINING SILICON BOUND TO ELEMENTS OF GROUP V	101
1. Silylamines	101
2. Silyl phosphines and arsines	117
6. COMPOUNDS CONTAINING SILICON BOUND TO ELEMENTS OF GROUP VI	122
1. Compounds containing SiO bonds	122
2. Compounds containing silicon-sulphur bonds	133
3. Silyl selenides	139
7. OTHER SILICON COMPOUNDS	144
1. Pseudohalogen derivatives	144
2. Compounds containing silicon bound to transition elements	152
3. Compounds containing silicon- boron bonds	152
4. Metal derivatives of silanes	153
8. CONCLUSIONS	156
INDEX	165
