## CONTENTS

| PAKII      | Sincon-Assisted Organic Synthesis  |     |
|------------|--|-----|
| Chapter 1  | Stereochemical and Reactivity Patterns in Silyl-Substituted Cycloalkanes and             |     |
|            | Acyclic Analogues  | 3   |
| Chapter 2  | Trialkylsilyl Protecting Groups in the Synthesis of $lpha$ -Hydroperoxy Carbonyl         |     |
|            | Compounds  | 15  |
| Chapter 3  | Applications of Organosilicon Chemistry to the Synthesis of Polyoxygenated               |     |
|            | Natural Products   | 25  |
| Chapter 4  | Silicon-Mediated or Group Transfer Polymerization  | 41  |
| Chapter 5  | Effect of Substituent on Reactions Remote from Silicon - Application in Organic          |     |
|            | Synthesis  | 49  |
| Chapter 6  | Silicon-Assisted Synthesis of 7-Lactams  | 65  |
| Chapter 7  | Directing Effects of a Silyl Group on Cationic Carbon Skeleton Rearrangements            | 73  |
| Chapter 8  | Silicon Mediated Transformations in Organic Synthesis                                    | 83  |
| PART II    | ORGANIC CHEMISTRY OF SILICON   |     |
| Chapter 9  | Elimination Reactions of 7-Functional Organosilicon Compounds                            | 95  |
| Chapter 10 | Syntheses and Properties of Phenylethynylsilanes and Polyphenylphenylsilanes             | 105 |
| Chapter 11 | Chemistry to Synthesize Silicone Intermediates from Silica                               | 115 |
| Chapter 12 | New Approaches to Organosilicon Compounds  | 123 |
| PART III   | SILICON IN LIVING SYSTEMS  |     |
| Chapter 13 | The Value and New Directions of Silicon Chemistry for Obtaining Bioactive                |     |
|            | Compounds  | 135 |
| Chapter 14 | Silicon in Living Systems  | 145 |
| Chapter 15 | Permethylated Siloxane Insect Toxicants  | 153 |
| PART IV    | SILICON REACTIVE INTERMEDIATES   |     |
| Chapter 16 | Mechanism of Photochemical Reactions of Aryldisilanes. The ( $\sigma$ $\pi$ ) Orthogonal |     |
|            | Intramolecular Charge-Transfer (OICT) States   | 163 |
| Chapter 17 | Quantitative Aspects of Silylene Reactions   | 173 |
| Chapter 18 | Silyl Cations  | 183 |
| Chapter 19 | The Chemistry of Unsaturated Silicon Compounds. Nickel-Catalyzed Reactions               | 191 |
| Chapter 20 | Unexpected Chemistry in the Production of Multiple Bonds to Silicon by Thermal           | l   |
|            | Beta-Eliminations  | 201 |
| Chapter 21 | Intermediates with Si=O Multiple Bond: Generation, Stabilization and Direct              |     |
|            | Spectroscopic Study  | 211 |
| Chapter 22 | Some Aspects of the Reactivity of Hypervalent Species of Silicon                         | 225 |

| PART V     | SILICON-SILICON CHEMISTRY  |     |
|------------|--|-----|
| Chapter 23 | Polysilanes  | 237 |
| Chapter 24 | Synthesis and Properties of Strained Cyclopolysilanes  | 247 |
| Chapter 25 | Silicon and Germanium Double Bond and Polycyclic Ring Systems  | 257 |
| Chapter 26 | Oxidation of Disilenes with Atmospheric Oxygen: A Status Report  | 269 |
| DADT VI    | SILICON-OXYGEN POLYMERS AND MATERIALS  |     |
| PART VI    |  | 285 |
| Chapter 27 | Silicones Past, Present, and Future  Machanistic Footness of Processes Londing to Linear Silanore Polymers |     |
| Chapter 28 | Mechanistic Features of Processes Leading to Linear Siloxane Polymers                                      | 297 |
| Chapter 29 | Synthesis of Porous Tectosilicates: Parameters Controlling the Pore Geometry                               | 307 |
| PART VII   | INORGANIC CHEMISTRY OF SILICON   |     |
| Chapter 30 | Transition Metal Substituted Silanes: Ligand Exchange at the Silicon and Metal                             |     |
|            | Centre   | 327 |
| Chapter 31 | From Aminofluorosilanes to Iminosilanes  | 337 |
| Chapter 32 | The HSiR <sub>3</sub> /CO/Co <sub>2</sub> (CO) <sub>8</sub> Catalytic Reactions                            | 347 |
| Chapter 33 | New Enthusiasm for Metal Silicides: Their Relationship to Zintl Phases                                     | 357 |
| PART VIII  | SILICON IN SOLID STATE TECHNOLOGY  |     |
| Chapter 34 | The Chemical Vapor Deposition of Silicon Thin Films  | 367 |
| Chapter 35 | Silicon Containing Photoresists  | 377 |
| Chapter 36 | Plasma Etching of Silicon and Silicon Oxides   | 391 |
| Chapter 37 | Mechanisms of Silicon CVD  | 405 |
| Chapter 38 | Applications of Methyldichlorosilane in Preparation of Silicon-Containing                                  | 403 |
| Chapter 36 | Ceramics   | 415 |
|            | Columbia   |     |
| PART IX    | PHYSICAL CHEMISTRY, THEORETICAL STUDIES AND SPECTROSC  | OPY |
| Chapter 39 | Recent Advances in 1) Mechanism and Kinetic of Alkylsilylene Reactions & in 2)                             | )   |
|            | Silicon Hydride Kinetics and Thermochemistry   | 429 |
| Chapter 40 | Absolute Rate Constants for Silylene Reactions in the Gas Phase  | 439 |
| Chapter 41 | Thermochemistry and Reactivity of Silylenes  | 447 |
| Chapter 42 | Theoretical Studies of Organosilicon Chemistry   | 459 |
| Chapter 43 | Molecular Mechanics Calculations for Predictions of Organosilane Structures                                |     |
|            | and Reactivities   | 471 |
| Chapter 44 | The Acidity of Silica Surfaces   | 481 |
| Chapter 45 | Polysilane Photochemistry and Laser Desorption Spectrometry  | 491 |
| Chapter 46 | The Spectroscopy and Photochemistry of Some Silicon Halide and Silicon                                     |     |
|            | Hydride Molecules  | 503 |
| Chapter 47 | Mass Spectrometry and Ion-Molecule Reactions in Silanes  | 513 |
| Chapter 48 | <sup>29</sup> Si NMR Spectroscopy in Organic Chemistry   | 525 |
| Chapter 49 | Unstable Intermediates in Pyrolysis and Alkali Metal Vapor Dehalogenations of                              |     |
|            | Organosilicon Compounds  | 533 |
|            |  |     |
