

CONTENTS

Introduction The Role of Phosphorus in the World	1
1. Total Phosphorus	9
PART 1 SEPARATION METHODS	
2. Gas Chromatography of Phosphorus Compounds	69
3. Chromatography in Solution	93
PART 2 IDENTIFICATION METHODS	
4. High-Resolution Nuclear Magnetic Resonance	151
5. Vibrational Spectroscopy of Phosphorus Compounds	189
6. The Mass Spectroscopy of Phosphorus Compounds	295
7. Identification and Analysis of Phosphate Minerals	333
PART 3 COMPOUNDS GROUPS	
8. Analysis of Elemental Phosphorus	361
9. Tervalent Phosphorus Compounds	371
10. Phosphorus Halides	385
11. Phosphorus Oxides and Oxo Acids	409
12. Phosphorus-Nitrogen Compounds	463
13. The Cyclophosphazenes	523
14. Phosphorus-Sulfur Compounds	593
15. Analytical Methods for Phosphoranes	611
16. Sugar Phosphates and Sugar Nucleotides	617
17. Phosphorus Lipids	659
18. Natural Carbon-Phosphorus Compounds	703
PART 4 SPECIFIC MATERIALS	
19. Soil Phosphorus	727
20. Analysis of Phosphorus Compounds in Natural Waters	743
21. Phosphorus in Fertilizers and Feedstuffs	771
22. Organophosphorus Insecticides	793
Subject Index	831
