

CONTENTS

7 Sulfides	
7.1 Introduction	1
7.2 Physical Properties	10
7.3 Methods for Detection and Determination of Sulfides	30
7.4 Sample Preparation and Stability of Samples	79
8 Di-and Polysulfides	89
8.1 Introduction	89
8.2 General Chemistry	106
8.3 Physical Properties	146
8.4 Analysis	322
9 Thiophenes	433
9.1 Introduction	433
9.2 Background	434
9.3 Measured and Calculated Properties	436
9.4 Chemical Methods of Analyses	440
9.5 Spectroscopic Methods of Analysis	449
9.6 Summary	484
10 Sulfur Analogs of Carbonyls, Carboxylic and Carbonic Acids	491
10.1 Thioaldehydes and Thioketones	494
10.2 Thiocarboxylic Acids	501
10.3 Esters of Thiocarboxylic Acids	511
10.4 Miscellaneous Thiocarboxylic Acid Derivatives	542
10.5 Thioamides	548
10.6 Monothiocarbonic Acid Esters	569
10.7 Dithiocarbonates	578
10.8 Trithiocarbonic Acid Derivatives	602
10.9 Monothiocarbamic Acid Derivatives	612
10.10 Dithiocarbamic Acid Salts	620
10.11 Dithiocarbamate Esters (Dithiourethanes)	644
10.12 Thiuram Sulfides-(R ₂ NCS) ₂ S _x	651
10.13 Thiourea and N-Substituted Thioureas	668
10.14 Thiocarbazides and Related Compounds	684
10.15 Thiohydantoins	703
10.16 Isothiocyanates-RN=C=S	713

11 Tetra- and Hexavalent Organosulfur Compounds	757
11.1 Introduction and Scope	757
11.2 Occurrence and Uses	758
11.3 Descriptive Properties	762
11.4 Analytically Significant Physical and Chemical Properties	782
11.5 Methods	801
