

CONTENTS

I.	Introduction	1
II.	Inorganic Chemistry of Group Ia and IIa Metals	14
III.	Complexes of Ia and IIa Cations in Organic and Biological Chemistry	45
IV.	Atomic Structure and Structure-Activity Correlations	65
V.	Bonding in Ligands and Metal Complexes	78
VI.	Ligand Exchange Reactions and Factors in Complex Stability	105
VII.	Redox Potentials and Processes	134
VIII.	Influencing Equilibria with Metal Ions: Synthesis via Chelation	186
IX.	Catalysis by Metal Ions, Metal Complexes, and Metalloenzymes	215
X.	Oxygen and Nitrogen	252
XI.	Organometallic Complexes: Structure, Bonding, and Reaction Mechanisms	296
XII.	Reactions of Ligands in Organometallic Complexes	338
	SUBJECT INDEX	395
