

## CONTENTS

Preface	xi
1. An Introduction to Inorganic and organometallic Polymers	1
<b>POLYSILANES AND POLYCARBOSILANES</b>	
2. Polysilane High Polymers: An Overview	6
3. Polycarbosilanes: An Overview	21
4. Soluble Polysilane Derivatives: Chemistry and Spectroscopy	43
5. Poly(di- <i>n</i> -hexylsilane) in Room-Temperature Solution: Photophysics and Photochemistry	61
6. New Synthetic Routes to Polysilanes	78
7. Polymerization of Group 14 Hydrides by Dehydrogenative Coupling	89
8. Polysilylene Preparations	101
9. Characterization of Copolydiorganosilanes with Varying Compositions	112
<b>POLYSILAZANES AND POLYSILAZOXANES</b>	
10. Synthetic Routes to Oligosilazanes and Polysilazanes: Polysilazane Precursors to Silicon Nitride	124
11. Organosilicon Polymers as Precursors for Silicon-Containing Ceramics: Recent Developments	143
12. NMR Characterization of a Polymethyldisilylazane: A Precursor to Si-C-N-O Ceramics	156
13. Silicon-Nitrogen-Containing Rings and Polymers	166
<b>POLYSILOXANES</b>	
14. Recent Advances in Organosiloxane Copolymers	180
15. Polysiloxanes Functionalized with 3-(1-Oxypyridinyl) Groups: Catalysts for Transacylation Reactions of Carboxylic and Phosphoric Acid Derivatives	199
16. Photochemical Behavior of Organosilicon Polymers Bearing Phenylsilyl Units	209
17. Routes to Molecular Metals with Widely Variable Counterions and Band-Filing: Electrochemistry of a Conductive Organic Polymer with an Inorganic Backbone	224
18. A New Approach to the Synthesis of Alkyl Silicates and Organosiloxanes	238
<b>POLYPHOSPHAZENES</b>	
19. Current Status of Polyphosphazene Chemistry	250
20. Phosphazene Polymers: Synthesis, Structure, and Properties	268
21. Polyphosphazenes: Performance Polymers for Specialty Applications	277
22. Poly(alkyl/aryl)phosphazenes	283
23. Hybrid Inorganic-Organic Polymers Derived from Organofunctional Phosphazenes	290

24. Polybis(pyrrolyl)phosphazene	296
25. Skeletal Stabilization as the Basis for Synthesis of Novel Phosph(III)azane Oligomers and Polymers	303

#### **ORGANOELEMENT-OXO POLYMERS DERIVED FROM SOL-GEL PROCESSES**

26. Structure of Sol-Gel-Derived Inorganic Polymers: Silicates and Borates	314
27. Organically Modified Silicates as Inorganic-Organic Polymers	333
28. Sol-Gel Preparation and Properties of Fibers and Coating Films	345
29. New Hybrid Materials Incorporating Poly(tetramethylene oxide) into Tetraethoxysilane-Based Sol-Gel Glasses: Structure-Property Behavior	354

#### **BORON-CONTAINING POLYMERS**

30. Precursors to Nonoxide Macromolecules and Ceramics	378
31. Boron-Nitrogen Polymer Precursors	385
32. Boron Nitride and Its Precursors	392

#### **OTHER METAL-AND METALLOID-CONTAINING POLYMERS**

33. Electron Transport in and Electrocatalysis with Polymeric Films of Metallotetraphenylporphyrins	408
34. Electronically Conducting Films of Poly(trisbipyridine)-Metal Complexes	420
35. Copper Chloride Complexes with Poly(2-vinylpyridine)	430
36. Cationic and Condensation Polymerization of Organometallic Monomers	437
37. Soluble Metal Chelate Polymers of Coordination Numbers 6, 7, and 8	463
38. A New Class of Oligomeric Organotin Compounds	469
39. NMR Characterization of the Compositional and Configurational Sequencing of Tri- <i>n</i> -butyltin Polymers	483

#### **INDEXES**

Author Index	498
Affiliation Index	499
Subject Index	499
