

CONTENTS

| | |
|--|-----|
| 1. Periodicity | 1 |
| 2. Radioactivity | 13 |
| 3. Energy Levels and Bond Formation | 18 |
| 4. Methods of Determining Structure | 30 |
| 5. Structure of Elements | 37 |
| 6. Structure of Compounds | 49 |
| 7. Formulae | 63 |
| 8. Molecular Motion | 77 |
| 9. Enthalpy | 87 |
| 10. Equilibrium | 101 |
| 11. Cells | 113 |
| 12. Free Energy | 128 |
| 13. Extraction of Metals from Their Ores | 134 |
| 14. Equilibria between Phases | 147 |
| 15. Colligative Properties | 167 |
| 16. Surfaces | 178 |
| 17. Reaction Rates | 185 |
| 18. Hydrogen | 196 |
| 19. Acids | 206 |
| 20. The s-block Metals and Aluminium | 222 |
| 21. The Halogens-a Typical Non-metal Group | 244 |
| 22. Oxygen and Sulphur-showing Differences between First and Second Row Elements | 260 |
| 23. The Group V elements-showing Trends down a Group | 275 |
| 24. Boron, Carbon and Silicon-showing Diagonal Relationships | 292 |
| 25. B-metals | 306 |
| 26. The Transition Metals | 320 |
| | |
| A-level Examination Questions | 341 |
| Appendix I. Half-cell potential data | 345 |
| Appendix II. Atomic weights | 347 |
| Appendix III. Ionization energies of the elements from hydrogen to sodium | 348 |
| Appendix IV. Physical constants and conversion factors and units | 349 |
| INDEX | 351 |
