Ref. 546 SNE V.6

CONTENTS

I. THE ALKALI METALS

Introduction, 3; Chemical Properties, 7; Preparation of the Metals, 9; Alloys, 12; Francium, 16

PROPERTIES OF THE ALKALI METALS AND SOME OF THEIR COMPOUNDS IN LIQUID AMMONIA 22

Chemical Properties of the Alkali Metals in Liquid Ammonia, 27; Properties of Salts in Liquid Ammonia, 32; Solvates, Complexes, and Thermal Data, 33; Amides, 37; Arsenates and Arsenites, 38; Azides, 40; Borates, 41; Borides, 45; Carbonates and Hydrogencarbonates, 45; Thio-and Perthiocarbonates, 60; Carbonyls, 61; Carbides, 61; Cyanates and Thiocyanates, 61; Cyanides, 64; Hexacyano-ferrates(II); Hexacyanoferrates (III), 68; Halides, 69; Fluorides, 91; Alkali Salts of the Oxyhalogens, 95; Poly-halides, 108; Hydrides, 112; Hydroxides, 117; Nitrates, 124; Nitrides, 130; Nitrites, 130; Organo-Alkali Compounds, 135; Oxides and Peroxides, 137; Permanganates, 140; Phosphates, 141; Phosphides, 151; Silicates, 152; Sulfates, 155; Peroxysulfates, 160; Fluosulfonates and Sulfamates, 161; Alums, 161; Sulfides, 166; Sulfites and Hyposulfites, 173; Thiosulfates, 173; Thionates, 175

ANALYTICAL CHEMISTRY 178

II. HYDROGEN AND ITS ISOTOPES 185

Introduction, 185; Ortho-and Parahydrogen, 186; History, 189; Occurrence, 189; Preparation of Hydrogen, 190; Physical Properties, 200; Chemical Properties, 206; Electronic Behavior, 220; Physiological Action of Hydrogen, 221; Uses of Hydrogen, 221

DEUTERIUM 221

Preparation, 222; Physical Properties, 222; Chemical Properties, 223

TRITIUM 224

INDEX 227
