

The Determination of Formation Constants of Complexes

BY STURE FRONÆUS, THE UNIVERSITY OF LUND, SWEDEN

Contents

I. Introduction.....	2
II. Calculation of Complexity Constants.....	3
1. Basic Functions and Equations.....	3
2. Different Calculation Techniques.....	5
A. Graphical Methods.....	5
(1) Psets of Data $X, [A]$	5
(2) Sets of Data $\alpha_j, [A]$	6
(3) Sets of Data $\bar{n}, [A]$	6
B. Numerical Methods.....	7
(1) Solution of Sets of Equations.....	7
(2) Approximation Technique.....	8
C. Curve Fitting.....	8
D. On the Precision of the Calculations.....	9
III. Experimental Methods.....	10
1. Potentiometric Methods.....	10
A. Measurement of $[M]$	11
(1) Mononuclear Complexes.....	11
(2) Mononuclear as Well as Polynuclear Complexes.....	13
B. Measurement of $[A]$	15
C. The Method of Ligand Displacement.....	17
D. Comments on the Potentiometric Methods.....	20
2. The Polarographic Method.....	20
3. Solubility Methods.....	22
4. Solvent-Extraction Methods.....	24
5. Spectrophotometric Methods.....	26
6. Cation-Exchange Methods.....	30
7. Various Methods.....	33
IV. References.....	34
