## Volume V

<b>I. Introduction</b> .....	1
<b>II. Basic Considerations</b> .....	2
<b>III. Sources</b> .....	3
1. The Sun.....	3
2. The Carbon Arc.....	5
3. Electrical Resistors.....	10
4. High Pressure Compact Arcs.....	13
5. Plasma Generators.....	16
<b>IV. Concentrators</b> .....	18
1. Special Optical Systems.....	26
<b>V. Mirror Materials</b> .....	30
<b>VI. Geometrical Perfection of Mirrors</b> .....	32
<b>VII. Size and Shape of Target</b> .....	34
<b>VIII. Flux Calculations</b> .....	36
<b>IX. Flux Measurements</b> .....	38
1. Calorimetry.....	39
2. Radiometry.....	51
<b>X. Image Size and Flux</b> .....	61
<b>XI. Flux Attenuation and Shutters</b> .....	73
<b>XII. Sample Holders</b> .....	81

<b>XIII. Applications</b> .....	103
1. Radiative Parameters.....	103
2. Spectrography.....	111
3. Heat Capacity.....	111
4. Thermal Conductivity.....	114
5. Thermal Expansion Coefficient.....	117
6. Electrical Resistivity.....	118
7. Fusion.....	119
8. Vaporization.....	123
9. Crystallography.....	124
10. Inorganic Systems.....	132
11. Organic Systems.....	135
12. Graphite.....	137
13. Ablation.....	138
14. Analysis.....	142
15. Purification.....	142
16. Engineering Testing.....	143
17. Ignition Studies.....	144
18. Burn Studies.....	145
19. Energy Conversion.....	146
20. Ionization.....	148
21. Generation of Water.....	148
22. Radiation Standard.....	149
23. Laser.....	149
<b>XIV. Special Arrangements</b> .....	149
<b>XV. Appendix</b> .....	153
<b>References</b> .....	170
