

Crystal Growth Techniques

K. NASSAU

BELL TELEPHONE LABORATORIES. INC.,
MURRAY HILL. NEW JERSEY

Contents

- I. General Considerations..... 2
 - A. On Choosing a Crystal Growth Technique..... 2
 - B. The Crystal Growing Literature..... 3
 - C. Crystal Characterization..... 4
 - D. Crystal Defects..... 5
 - E. High-Temperature Apparatus..... 8
 - F. Phase Diagram Considerations..... 10
 - G. Classification of Growth Techniques..... 12
- II. Melt Techniques of Crystal Growth..... 13
 - A. The Bridgman-Stockbarger Technique..... 14
 - B. Czochralski Growth..... 23
 - C. **Zone Growth**..... 30
 - D. Verneuil Growth..... 33
 - E. Theory of Melt Growth..... 36
- III. Solution Techniques of Crystal Growth..... 43
 - A. Solution Growth..... 44
 - B. Hydrothermal Growth..... 47
 - C. **Flux Growth**..... 49
 - D. Solution Alloy Growth..... 51
 - E. Solution Transport Techniques..... 51
 - F. Theory of Solution Growth..... 54
- IV. Vapor-Phase Crystal Growth..... 55
 - A. **Growth by Condensation**..... 56
 - B. Vapor-Phase Reaction Growth..... 58
 - C. Vapor-Phase Transport Growth..... 59
 - D. Vapor-Liquid-Solid Growth..... 59
 - E. Theory of Vapor-Phase Growth..... 60
- V. Solid-Solid Transformation Crystal Growth..... 62
- VI. Conclusions..... 63
 - References..... 64
