

CONTENTS

Chapter 1 Melting Points	1
Chapter 2 Crystallization	7
Chapter 3 Boiling Points and Distillation	10
Chapter 4 Chromatography	24
Chapter 5 Spectra and Structure	37
Chapter 6 Chemical and Physical Equilibria	49
Chapter 7 Nucleophilic Substitution Reactions	59
Chapter 8 Reactions of Functional Groups: Aliphatic Hydrocarbons, Halides, Alcohols, and Ethers	68
Chapter 9 Elimination Reactions	77
Chapter 10 Multistep Organic Syntheses. Identification of Compounds	84
Chapter 11 Polymers and Polymerization	93
Chapter 12 Stereochemistry	98
Chapter 13 Triphenylcarbinol and Related Compounds	102
Chapter 14 Carbonyl Compounds	108
Chapter 15 Bimolecular Reduction of Acetone: Compounds Derived from Pinacol	120
Chapter 16 The Beckmann Rearrangement	126
Chapter 17 Aromatic Compounds	129
Chapter 18 Heterocyclic Compounds	152
Chapter 19 Reactions of Functional Groups: Carbonyl Compounds and Amines	159
Chapter 20 Qualitative Analysis: General Unknown	163
Chapter 21 Free Radical Reactions	169
Appendix I. Generalizations on Solubilities	175
Appendix II. Drying Agents	176
Some Useful Infrared Spectral Frequency Assignments	177
Index	179
