

TABLE OF CONTENTS

1 Introduction	1
Development of Chemistry of Organic Compounds of Fluorine	1
Nomenclature of Organic Compounds of Fluorine	6
Handling of Fluorine, Hydrogen Fluoride, and Fluorides	13
2 Apparatus and Material	15
Laboratory Equipment	15
Chemical Resistance of Materials	18
3 Fluorinating Agents	24
4 Methods for Introducing Fluorine into Organic Compounds	36
Addition of Hydrogen Fluoride	36
Addition of Hydrogen Fluoride to Olefins	36
Addition of Hydrogen Fluoride to Acetylenes	40
Addition of Hydrogen Fluoride to Other Unsaturated Compounds	41
Addition of Fluorine	41
Addition of Fluorine to Olefins and Acetylenes	42
Addition of Fluorine to Aromatic Systems	47
Addition of Fluorine to Other Unsaturated Systems	48
Addition of Halogen Fluorides to Unsaturated Systems	52
Addition of Fluorine and Other Elements across Multiple Bonds	56
Replacement of Hydrogen by Fluorine	67
Fluorination with Elemental Fluorine	67
Electrochemical Fluorination Process	73
Fluorination with Cobalt Trifluoride and Transition Metal Fluorides	77
Fluorination with Halogen Fluorides	82
Fluorination with Perchloryl Fluoride	83
Fluorination with Xenon Fluorides	90
Fluorination with Trifluoromethyl Hypofluorite	91
Replacement of Halogens by Fluorine	91
Replacement of Halogens by Fluorine by Means of Elemental Fluorine, High-Valency Metal Fluorides, and the Electrochemical Process	93
Replacement of Halogens by Fluorine by Means of Hydrogen Fluoride	95
Replacement of Halogens by Fluorine by Means of Antimony Fluorides	100
Replacement of Halogens by Fluorine by Means of Silver Fluoride	106
Replacement of Halogens by Fluorine by Means of Mercury Fluorides	109
Replacement of Halogens by Fluorine by Means of Potassium Fluoride	112
Replacement of Halogens by Fluorine by Means of Other Fluorides	128
Replacement of Oxygen by Fluorine	136
Cleavage of Ethers	136
Cleavage of Esters	139
Replacement of Hydroxylic Group by Fluorine	143
Replacement of Carbonyl Oxygen by Fluorine	150
Replacement of Nitrogen by Fluorine	160

5 Reactions of Organic Fluorine Compounds	170
Reduction	170
Catalytic Hydrogenation	170
Reduction with Complex Metal Hydrides	179
Reduction with Metals	188
Reduction with Inorganic Compounds	193
Reduction with Organic Compounds	195
Oxidation	198
Oxidation by Oxygen	199
Oxidation by Hydrogen Peroxide and Peroxy Acids	202
Oxidation by Nitrogen Oxides and Nitric Acid	204
Oxidation by Chromium Compounds	208
Oxidation by Potassium Permanganate	210
Oxidation by Other Reagents	212
Halogenation	213
Reactions with Halogens	214
Addition Reactions of Halogens	214
Replacement of Hydrogen by Halogens	217
Replacement of Carboxylic Groups by Halogens	225
Halogenolysis of Fluorinated Compounds	226
Reactions with Hydrogen Halides	228
Reactions with Non-metal and Metal Halides	232
Nitration	237
Nitrosation	242
Sulfonation	245
Acid-catalyzed Syntheses	246
Acid-catalyzed Additions across Double Bonds	247
Friedel-Crafts Syntheses	248
Hydrolysis	255
Hydrolysis of Non-fluorinated Parts of the Molecules	255
Hydrolytic Removal of Fluorine	257
Hydrolysis of Monofluoro Derivatives	258
Hydrolysis of Geminal Difluoro Derivatives	266
Hydrolysis of Trifluoromethyl Group	273
Hydrolysis of Perfluoro Derivatives	274
The Fluoroform Reaction	276
Alkylation	278
Alkylation at Oxygen	279
Alkylation at Sulfur	290
Alkylation at Nitrogen	293
Alkylation at Carbon	297
Alkylations at Other Elements	301
Arylation	301
Arylation at Oxygen	302
Arylation at Sulfur	310
Arylation at Nitrogen	313
Arylation at Carbon	322
Acylation	325
Acylation at Oxygen and Sulfur	325
Acylation at Nitrogen	331
Acylation at Carbon	333
Sulfonylation and Kindred Reactions	334
Base-catalyzed Condensations	336

Condensation of Aldehydes and Ketones with Hydrocarbons, Nitroparaffins, and Hydrogen Cyanide	336
The Aldol Condensation and Related Reactions	341
Reactions of Aldehydes and Ketones with Acids and their Derivatives	347
Reactions of Esters with Ketones, Esters, and Nitriles (Claisen Condensation)	352
Michael Addition	356
Reactions of Organometallic Compounds	358
Organomagnesium Compounds	358
Reactions of Fluorinated Compounds with Grignard Reagents	358
Preparation and Reactions of Fluorinated Grignard Reagents	365
preparation and Reactions of Perfluoro-organomagnesium Halides	372
Organolithium Compounds	379
Reactions of Fluorinated Compounds with Organolithium Derivatives	380
Preparation and Reactions of Fluorinated Lithium Compounds	384
Organomercury Compounds	395
Organozinc and Organocadmium Compounds	398
Organocopper Compounds	400
Organosilver and Organogold Compounds	402
Other Organometallics and Organometalloids	403
Additions	405
Linear Additions across Carbon–Carbon Double Bonds	406
Additions Forming Carbon–Oxygen Bonds	406
Additions Forming Carbon–Sulfur Bonds	410
Additions Forming Carbon–Nitrogen Bonds	414
Additions Forming Carbon–Carbon Bonds	420
Additions Forming Bonds between Carbon and Silicon, Tin, and Phosphorus	432
Linear Additions to Acetylenic Compounds	434
Additions Forming Carbon–Oxygen, Carbon–Sulfur, Carbon–Nitrogen, and Carbon–Phosphorus Bonds	434
Additions Forming Carbon–Carbon Bonds	436
Additions across Heterogeneous Multiple Bonds	438
Additions to Carbon–Nitrogen Bonds	438
Additions to Carbon–Oxygen Bonds	440
Additions to Unsaturated Elements	442
Cycloadditions	443
Cycloadditions Forming Three-membered Rings	443
Cycloadditions Forming Four-membered Rings	450
Cycloadditions Forming Five-membered Rings	463
Cycloadditions Forming Six-membered Rings — Diels–Alder Reaction	465
Eliminations	481
Dehalogenation	481
Intramolecular Dehalogenation	481
Intermolecular Dehalogenation	488
Dehydrohalogenation	489
Dehydration	495
Decarboxylation	496
Decarbonylation and Elimination of Other Fragments	500
Molecular Rearrangements	501
Migration of Halogen Atoms	501
Valence Tautomerism and Ring-size Change	505
Changes in the Carbon Skeleton	508
Pyrolysis and Photolysis	515
6 Fluorinated Organic Compounds as Reagents	519
Trifluoroacetic Acid	519
Trifluoroacetic Anhydride	521

Trifluoroperoxyacetic Acid	524
Trifluoroacetylhydroxylamines	527
Trifluoroacetyl Hypohalites	527
N-Bromo Fluoroacetyl Amides	527
Other Reagents and Solvents	529
7 Properties of Organic Compounds of Fluorine	531
Physical Properties	531
Melting Points	531
Boiling Points	531
Density	539
Refractive Index	539
Dielectric Constant	541
Surface Tension	541
Viscosity	542
Solubility	543
Physicochemical Properties	545
Formation of Molecular Complexes and Azeotropes	545
Fluorine-Hydrogen Bonding	546
Fluorinated Compounds as Acids and Bases	546
Biological Properties	552
Fluorophosphates	553
Fluoroacetates	553
Fluorinated Steroids	555
Fluorinated Hydrocarbons and Ethers	555
8 Analysis and Structure Determination of Organic Fluorides	558
Destructive Analytical Procedures	558
Qualitative Tests for Fluorine	559
Quantitative Determination of the Fluoride Ion	561
Determination of Fluorine Bound to Carbon	563
Determination of Other Elements in Organic Compounds of Fluorine	566
Analysis of Fluorine and Hydrogen Fluoride	568
Analysis of Refrigerants and Other Fluorinated Products	569
Modern Methods of Separation, Identification, and Structure Determination	570
Gas-liquid or Vapor-phase Chromatography	570
Mass Spectrometry	571
Infrared Spectrophotometry	572
Nuclear Magnetic Resonance Spectra	576
Proton Magnetic Resonance	576
Fluorine Magnetic Resonance	579
Other Physical Methods	594
9 Practical Applications of Organic Fluorine Compounds	595
Refrigerants, Propellants, and Fire Extinguishers	595
Preparation of Fluorinated Refrigerants	595
Properties of Fluorinated Refrigerants	597
Applications of Fluorinated Refrigerants	599
Fluorinated Plastics	601
Preparation of the Monomers	601
Polymerization	603
Properties of Fluorinated Polymers and Copolymers	605
Polychlorotrifluoroethylene	606

Table of Contents

xiii

Polytetrafluoroethylene	607
Fluorinated Copolymers	608
Processing and Applications of Fluorinated Polymers	609
Fluorinated Pharmaceuticals	610
Other Applications of Organic Compounds of Fluorine	613
10 Preparation of Organic Compounds of Fluorine	615
11 Procedures	672
Fluorinating Agents	672
1. Potassium Hydrogen Fluoride	672
2. Silver Fluoride	672
3. Mercurous Fluoride	673
4. Mercuric Fluoride	673
5. Boron Trifluoride	673
6. Fluoroboric Acid	674
7. Sodium Fluoroborate	674
8. Silver Fluoroborate	674
9. Thallous Fluoride	674
10. Nitrosyl Fluoride and Nitryl Fluoride	674
11. Arsenic Trifluoride	675
12. Antimony Trifluoride	675
13. Antimony Pentafluoride	676
14. Sulfur Tetrafluoride	676
15. Sulfur Chloride Pentafluoride	676
16. Chlorine Monofluoride	677
17. Perchloryl Fluoride	677
18. Iodine Monofluoride	677
19. Iodine Pentafluoride	677
20. Cobalt Trifluoride	677
21. Carbonyl Chloride Fluoride	677
22. Carbonyl Fluoride	678
23. 2-Chloro-1,1,2-trifluoroethylethylamine	678
24. Diphenyltrifluorophosphorane	678
25. Triphenyldifluorophosphorane	678
26. Phenylsulfur Trifluoride	679
Organic Fluoro Compounds	679
Addition of Hydrogen Fluoride (27-32)	679
Addition of Fluorine (33-34)	681
Addition of Halogen Fluorides (35-37)	681
Replacement of Hydrogen by Fluorine (38-45)	682
Replacement of Halogens by Fluorine (46-62)	684
Replacement of Oxygen by Fluorine (63-73)	689
Replacement of Nitrogen by Fluorine (74-77)	691
Reduction (78-87)	693
Oxidation (88-92)	696
Halogenation (93-100)	697
Nitration (101-103)	699
Nitrosation (104)	700
Sulfonation (105)	700
Acid Catalyzed Syntheses (106-109)	701
Hydrolysis (110-116)	702
Alkylation (117-123)	705
Arylation (124-129)	706
Acylation (130-137)	707
Sulfonylation (138)	710
Base-catalyzed Condensations (139-146)	711
Reactions of Organometallic Compounds (147-168)	713
Additions (169-182)	719
Eliminations (183-188)	722

Molecular Rearrangements (189–191)	724
Pyrolysis (192)	725
Fluorinated Compounds as Reagents (193–199)	725
Practical Applications of Organic Fluorine Compounds (200–205)	727
Lists of References	729
Author Index	857
Subject Index	871
