

## CONTENTS

1. Calibration of a Thermometer	1
2. I. Melting Points	4
II. Sublimation	7
3. Boiling Points-Distillation-Fractional Distillation	11
4. Crystallization	18
5. I. Extraction	25
II. Drying Agents	29
6. Steam Distillation	32
7. Adsorption Chromatography	35
8. Qualitative Tests for the Elements	41
9. Preparation and Properties of Methane	44
10. Preparation of Ethane by Means of the Grignard Reaction	46
11. Properties of Kerosene	48
12. Ethylene and Ethylene Bromide	49
13. The Amylenes: 2-Methyl-2-Butene and 2-Pentene	52
14. Preparation and Properties of Acetylene	54
15. Chemistry of the Alcohols	56
16. I. Ethyl Iodide	59
II. Tertiary Butyl Chloride	60
17. I. Ethyl Bromide	62
II. Properties of Alkyl Halides	62
18. Ethyl Ether	64
19. Preparation of Cyclopentanone	67
20. I. Preparation of n-Butyraldehyde (Butanal)	69
II. Some Reactiones of Aldehydes and Ketones	70
21. I. Derivatives of Aldehydes and Ketones	73
II. Identification of an Unknown Carbonyl Compound	74
22. Dimethylglyoxime	75
23. I. Preparation of Chloroform	77
II. Properties of Chloroform	78
III. The Iodoform Test	78
24. Preparation of a Carboxylic Acid (Benzoic Acid) by the Grignard Method	80
25. Formic Acid	83
26. I. Ethyl Acetate	86
II. Preparation of Acetamide	87
27. Preparation and Properties of Acetyl Chloride	88

28. I. Preparation of Acetic Anhydride	90
II. Preparation of Acetamide	91
29. Preparation and Properties of Methylamine	93
30. Preparation and Properties of Acetonitrile	95
31. Some Chemical Properties of Ethylene Glycol and Glycerol	96
32. Oxalic Acid	98
33. I. Preparation of Ethyl Acetoacetate (Part A)	100
II. Alkylation of Ethyl Malonate (Part A)	101
34. I. Preparation of Ethyl Acetoacetate (Part B)	102
II. Alkylation of Ethyl Malonate (Part B)	103
35. I. N-Caproic Acid (Part A)	104
II. Reactions of Ethyl Acetoacetate	104
36. I. N-Caproic Acid (Part B)	106
II. Preparation of Adipic Acid	106
37. I. Diethyl Adipate (Azeotropic Esterification)	108
II. Properties of Lactic, Tartaric, and Citric Acids	109
38. Proteins	111
39. Amino Acids	113
40. Preparation and Properties of Urea	115
41. I. Preparation and Resolution of D,L- <i>s</i> -Octyl Hydrogen Phthalate	118
II. Optical Properties of Some Common Carbohydrates	119
42. I. Preparation of $\beta$ -D(+)-Glucose Pentaacetate	120
II. Preparation of Dextrorotatory 2-Octanol	120
43. Chemical Properties of Some Common Carbohydrates	122
44. Polysaccharides	124
45. Properties of Aromatic Hydrocarbons	127
46. Bromobenzene	129
47. Iodobenzene	131
48. Aromatic Nitro Compounds	132
49. Preparation of Aniline by Reduction of Nitrobenzene	134
50. Aniline and Some of Its Derivatives	136
51. Identification of an Unknown Amino Compound	138
52. I. Preparation of Sulfanilic Acid	140
II. Preparation of Acetanilide	140
53. I. P-Bromoacetanilide and Its Hydrolysis to P-Bromoaniline	141
II. Preparation of a Mixture of Benzene, Nitrobenzene, and Aniline	141
54. p-Nitroacetanilide and p-Nitroaniline	142
55. I. m-Nitroaniline	143
II. p-Nitrosodimethylaniline	143
56. I. Thiocarbanilides	145

II. Phenyl Isothiocyanate	145
57. Azobenzene, Hydrazobenzene, and Benzidine	147
58. Sulfanilamide	149
59. I. Chlorobenzene by the Sandmeyer Reaction	151
II. Toluene by Deamination of p-Toluidine	152
60. I. Preparation of Diazoaminobenzene to Aminoazobenzene	153
II. Rearrangement of Diazoaminobenzene to Aminoazobenzene	153
61. Preparation and Properties of Phenol	155
62. I. Preparation of Phenetole	157
II. Solid Derivatives of Phenol	157
63. Preparation of o- and p-Nitrophenol	159
64. Identification of an Unknown Phenolic Compound	161
65. Properties of Benzaldehyde	162
66. Preparation of Acetophenone by a Friedel and Crafts Reaction	163
67. Preparation of Benzophenone by a Friedel and Crafts Reaction	165
68. Benzophenone Oxime and Its Rearrangement to Benzanilide	167
69. Preparation of Triphenylcarbinol by a Grignard Reaction	168
70. Benzoin, Benzil, and Benzilic Acid	169
71. Preparation of Cinnamic Acid-the Perkin Reaction	171
72. Quinones	172
73. Benzoic Acid	174
74. Oxidation of p-Nitrotoluene to p-Nitrobenzoic Acid	176
75. Aromatic Hydroxy Acids (Salicylic Acid, Aspirin, and Tannic Acid)	178
76. Qualitative Organic Analysis	179
77. Dyes and Dyeing	182
78. Malachite Green, Phenolphthalein, and Fluorescein	184
79. I. 3-Aminophthalhydrazide ("Luminol")	187
II. Chemiluminescence	188
80. Heterocyclic Compounds-Phenylmethylpyrazolone, Furfural, and Pyridine	189
81. Preparation of Quinoline by the Skraup Synthesis	191
Special Reagents	192
Index	193
