

CONTENTS

Part I

I. Detection of the Elements	9
2. Distillation	14
3. Fractional Distillation	19
4. Determination of Melting Points	26
5. Crystallization	33
6. Extraction	40
7. The Amylenes (2-Methyl-Butene-2 and Pentene-2)	46
8. Reactions of the Saturated and Unsaturated hydrocarbons	49
9. n-Butyl Bromide	52
10. Diethyl Ether	58
11. Methyl Benzoate	62
12. Triphenylcarbinol (Grignard Synthesis)	67
13. Benzkoic Acid And n-Valeric Acid (Carbonation of The Grignard Reagent)	72
14. Acetyl Chloride	76
15. Aldehydes	79
16. Reactions of Aldehydes and Ketones	84
17. Acetamide	91
18. Synthesis of Mandelic Acid	94
19. Pinacol Hydrate	97
20. Succinic Hydrate	103
21. Characterization of the Amines	106
22. Physiological Formation of Hippuric Acid	113
23. Urea From Urine	117
24. Sugars	121
25. Polysaccharides	129
26. Sodium p-Toluene Sulphonate	136
27. Sodium b-Naphthalene Sulfonate	142
28. Nitrobenzene	144
29. Aniline	147
Steam Distillation	153
30. Acetanilide	163
31. p-Bromoacetanilide	167
32. p-Nitroacetanilide	170
33. b-Naphthol	171
34. Diphenylmethane (Friedel and Crafts hydrocarbon Synthesis)	175
35. ter-Butylbenzene and p-ter Butylphenol	179

36. o-benzoylbenzoic Acid	183
37. Anthraquinone	189
38. I-Benzoylnaphthalene	192
39. Benzophenone	197
40. Benzopinacol	202
41. Azo Dyes	206
42. o-Chlorotoluene	213
43. Benzoic Acid and phenylglyoxylic Acid	217
44. Acetyl Salicylic Acid	222
45. Benzoin and Benzil	224
46. Quinones	228
Vacuum Distillation	236
47. Naphthol-AS (Anilided of 2-Hydroxy-3-Naphthoic Acid)	250
48. Dyes and Dyeing	253
49. The Identification of Organic Compounds	258
50. Martius Yellow And Its Reduction Products	268
Part II	
Chapter	
I. Suggestions Regarding Advanced Work	281
II. Solvents, Reagents, And Gases	303
III. The Semi-Microdetermination of Carbon and Hydrogen	350
Index	361
