

CONTENTS

		Page
Chapter 1	Optically Active Phosphorus Compounds	1
Chapter 2	Developments in the Preparation and Use of Silicon-Containing Organophosphorus Compounds	55
Chapter 3	The Perkow and Related Reactions	115
Chapter 4	Nonhydrolytic Cleavage of Phosphorus Esters	173
Chapter 5	The Reduction of Quinquevalent Phosphorus to the Trivalent State	193
Chapter 6	Phosphorus Containing Umpolung Reagents	241
Chapter 7	α -Substituted Phosphonates	277
Chapter 8	Some Aspects of H-Phosphonate Chemistry	377
Chapter 9	Advance in ^{31}P NMR	435
Chapter 10	Phospholes and Related Compounds	483
Chapter 11	The Use of Carbon-Phosphorus Analogue Compounds in the Regulation of Biological Processes	559
Chapter 12	Glycerophospholipids: Some Reliable and Recent Syntheses	601
Chapter 13	The Application of Phosphinyl-Stabilized Ylids and Carbanions in the Synthesis of Phosphonates and Phosphinates of Biological Interest	655
Chapter 14	Phosphorus-Based Flame Retardants	683
Chapter 15	Aliphatic Carbon-Phosphorus Compounds as Herbicides	739
Chapter 16	Phosphorus Containing Insecticides	807
Index		875
