

## CONTENTS

CONTRIBUTORS . . . . .	v
PREFACE . . . . .	vii
CONTENTS OF VOLUME 1 . . . . .	xiii

### CHAPTER 1

#### **Optical Rotatory Dispersion**

*Gloria G. Lyle and Robert E. Lyle*

1.1 Introduction . . . . .	1
1.2 Definitions . . . . .	2
1.3 Treatment of Data . . . . .	3
1.4 Instrumentation . . . . .	12
1.5 Applications to Gross Structure Determinations . . . . .	13
1.6 Octant Rule . . . . .	38
1.7 Determination of Stereochemistry of Ring Junctions . . . . .	47
1.8 Determination of Absolute Configuration . . . . .	54
1.9 Conformational Analysis . . . . .	70
1.10 Analytical Methods . . . . .	83
References . . . . .	87

### CHAPTER 2

#### **Mass Spectrometry**

*F. W. McLafferty*

2.1 Introduction . . . . .	93
2.2 Instrumentation . . . . .	96
2.3 Empirical Formula Determination . . . . .	102
2.4 Mechanisms of Formation of Mass Spectra . . . . .	110
2.5 General Effects of Molecular Structure . . . . .	120
2.6 Rearrangements . . . . .	129
2.7 Functional Group Effects . . . . .	149
2.8 Special Techniques . . . . .	157
2.9 Applications . . . . .	162
2.10 Summary . . . . .	175
References . . . . .	175

### CHAPTER 3

#### **Infrared and Raman Spectroscopy**

*M. Kent Wilson*

3.1 Introduction . . . . .	181
3.2 Principles . . . . .	184

3.3	Applications . . . . .	206
3.4	Summary . . . . .	237
	List of Symbols . . . . .	239
	References . . . . .	240

**CHAPTER 4****Electronic Spectra of Polyatomic Molecules and the Configurations of Molecules in Excited Electronic States***D. A. Ramsay*

4.1	Symbols and Notation . . . . .	246
4.2	Introduction . . . . .	247
4.3	Theory of Electronic Spectra . . . . .	248
4.4	Molecular Orbitals . . . . .	275
4.5	Applications to Observed Spectra . . . . .	286
4.6	Summary . . . . .	331
	References . . . . .	334

**CHAPTER 5****Far and Vacuum Ultraviolet Spectroscopy***D. W. Turner*

5.1	Introduction . . . . .	339
5.2	<b>Ionization Potential Measurements</b> . . . . .	345
5.3	Structural Effects in Absorption Spectra . . . . .	364
	References . . . . .	399

**CHAPTER 6****High Resolution  $H^1$  and  $F^{19}$  Magnetic Resonance Spectra of Organic Molecules***W. D. Phillips*

6.1	Magnetic Properties of Nuclei . . . . .	401
6.2	Theory of Chemical Shifts . . . . .	403
6.3	Spin-Spin Interactions and Analysis of Spectra . . . . .	414
6.4	Theory of Spin-Spin Interactions . . . . .	420
6.5	Structure Determinations . . . . .	423
6.6	Inter- and Intramolecular Rate Processes . . . . .	437
6.7	Molecular Interactions and Equilibria . . . . .	454
	References . . . . .	460

**CHAPTER 7****Nuclear Magnetic Resonance Spectra of Elements Other than Hydrogen and Fluorine***Paul C. Louterbur*

7.1	Introduction . . . . .	465
7.2	Conventions and Spectral Characteristics . . . . .	468

7.3	Experimental Techniques . . . . .	472
7.4	Survey of Shifts, Couplings, and Applications . . . . .	475
7.5	The Future of Structure Determinations and Other Uses of NMR Spectra . . . . .	532
	References . . . . .	533

**CHAPTER 8****Nuclear Magnetic Resonance Spectra of Organic Solids***R. E. Richards*

8.1	Introduction . . . . .	537
8.2	Line Broadening in Solids . . . . .	540
8.3	Effects of Molecular Motion in Solids . . . . .	546
8.4	Applications to Polymers . . . . .	554
8.5	Effects of Nuclear Electric Quadrupole Moments . . . . .	556
8.6	Experimental Methods . . . . .	558
8.7	Conclusions . . . . .	560
	References . . . . .	561

**CHAPTER 9****Electron Paramagnetic Resonance of Organic Molecules***Richard Bersohn*

9.1	Introduction . . . . .	563
9.2	The Hydrogen Atom . . . . .	565
9.3	The Nitrogen Atom . . . . .	569
9.4	Semiquinone Ion . . . . .	572
9.5	Naphthalene Negative Ion . . . . .	576
9.6	The Methyl Radical . . . . .	579
9.7	Methyl Substituted Radicals . . . . .	582
9.8	Perinaphthene and Triphenylmethyl Radicals . . . . .	586
9.9	Triplet State of Naphthalene . . . . .	590
9.10	Measurement of the Distribution of the Unpaired Electrons in Radicals . . . . .	594
9.11	Rate of Electron Exchange Reactions . . . . .	601
9.12	High Energy Irradiation of Small Molecules . . . . .	606
9.13	Free Radicals Associated with Photosynthesis . . . . .	610
	References . . . . .	614

**CHAPTER 10****Electron Paramagnetic Resonance of the Organometallics***Richard E. Robertson*

10.1	Introduction . . . . .	617
10.2	Magnetic Resonance Parameters: Theoretical . . . . .	622
10.3	Molecules with Total Spin 1/2 . . . . .	633
10.4	Molecules with Total Spin Greater than 1/2 . . . . .	643
10.5	Metal-Metal Interaction . . . . .	646

<b>10.6</b>	Crystal and Molecular Structure . . . . .	650
<b>10.7</b>	Isotropic Nuclear Resonance Shifts . . . . .	655
	References . . . . .	659

**CHAPTER III****Nuclear Quadrupole Resonance Spectroscopy***Chester T. O'Konski*

<b>11.1</b>	Introduction . . . . .	661
<b>11.2</b>	Elements of Physical Theory . . . . .	663
<b>11.3</b>	Experimental Aspects . . . . .	675
<b>11.4</b>	Interpretation of Quadrupole Coupling Constants in Terms of Electronic Structure of Molecules . . . . .	679
<b>11.5</b>	Applications . . . . .	695
	References . . . . .	721
	Appendix A . . . . .	727
AUTHOR INDEX	. . . . .	735
SUBJECT INDEX	. . . . .	758
