

**CONTENTS**

Introduction	xv
1. Electric Potentials in Colloidal Systems	1
2. Acid-Base Equilibria of Proteins	35
3. Moving Boundary Electrophoresis-Theory	91
4. Moving Boundary Electrophoresis-Practice	137
5. Paper Electrophoresis	179
6. Zone Electrophoresis in Various Types of Supporting Media	225
7. Preparative Electrophoresis without Supporting Media	263
8. Applications of Moving Boundary Electrophoresis to Protein Systems	317
9. Clinical and Physiological Applications of Electrophoresis	369
10. The Electrophoresis of Viruses, Bacteria, and Cells, and The Microscope Method of electrophoresis	427
11. Applications of Zone Electrophoresis	493
Author Index	531
Subject Index	553
