PREFACE TO THE THIRD EDITION	iii
PREFACE TO THE SECOND EDITION	v
PREFACE TO THE FIRST EDITION	vii
CONTRIBUTORS	xiii
ABBREVIATIONS AND SYMBOLS	xv
1. Introductory Survey Manuel M. Baizer and Henning <b>Lund</b>	1
<u>I. PRINCIPLES AND METHODS</u>	
2. Basic Concepts Christian <b>Amatore</b>	11
3. Methods for the Elucidation of Organic Electrochemical Reactions Ole Hammerich and Vernon D. Parker	121
4. Relations Between Micro- and Macrophenomena Christian <b>Amatore</b>	207
5. Comparison Between Electrochemical and Analogous Chemical Reactions Hans J. <b>Schäfer</b>	233
<u>II. PRACTICAL PROBLEMS</u>	
6. Practical Problems in Electrolysis Henning Lund	253
<u>III. SYNTHETIC AND MECHANISTIC ASPECTS OF CATHODIC REACTIONS OF ORGANIC COMPOUNDS CLASSIFIED BY ELECTROPHORES</u>	
7. Cathodic Reactions of Hydrocarbons Herbert Kiesele and Jurgen Heinze	331
8. Halogenated Organic Compounds Dennis G. Peters	361
9. Cathodic Reduction of Nitro and Related Compounds Henning <b>Lund</b>	401
10. Carbonyl Compounds Manuel M. Baizer	433

11.	Reduction of Azomethine Compounds Henning Lund	465
12.	Carboxylic Acids and Derivatives Lennart Ebersson, James H. P. Utley, and John H. Wagenknecht	483
<u>IV. SYNTHETIC AND MECHANISTIC ASPECTS OF ANODIC REACTIONS OF ORGANIC COMPOUNDS CLASSIFIED BY ELECTROPHORES</u>		
13.	Anodic Oxidation of Hydrocarbons Lennart Ebersson, James H. P. Utley, and Ole Hammerich	505
14.	Carboxylic Acids Sigeru Torii and Hideo Tanaka	535
15.	Nitrogen-Containing Compounds Eberhard Steckhan	581
16.	Anodic Oxidation of Oxygen-Containing Compounds Ole Hammerich and Bo Svensmark	615
17.	Anodic Oxidation of Sulfur-Containing Compounds Bo Svensmark and Ole Hammerich	659
<u>V. ELECTROCHEMISTRY OF CERTAIN COMPREHENSIVE CLASSES OF COMPOUNDS</u>		
18.	Electrolysis of Heterocyclic Compounds Henning Lund	701
19.	Natural Products and Pharmaceuticals Yoshio Ban, Tameo Iwasaki, and Hiroshi Ohmizu	765
20.	Biomass Helena L. Chum	787
21.	Organoelemental and Coordination Compounds Lorenz Walder	809
<u>VI. ELECTRODE REACTIONS CLASSIFIED BY REACTION TYPE</u>		
22.	Electrolytic Reductive Coupling Manuel M. Baizer	879
23.	Electrolytic Oxidative Coupling Hans J. Schafer	949
24.	Cleavages and Deprotection Henning Lund	1029
25.	Anodic Substitution Lennart Ebersson, James H. P. Utley, and Ole Hammerich	1069

Contents	xi
26. Anodic Fluorination W. V. Childs, Leif Christensen, F. W. Klink, and C. F. Kolpin	1103
<u>VII. STEREOCHEMISTRY</u>	
27. Stereochemistry of Organic Electrode Processes Tsutomu Nonaka	1131
<u>VIII. INDIRECT REACTIONS</u>	
28. Amalgam and Related Reductions Henning Lund	1199
29. Electrogenerated Reagents Jacques Simonet	1217
30. Electrogenerated Acids and Bases Manuel M. Baizer	1265
<u>IX. PRESENT AND FUTURE APPLICATIONS</u>	
31. Industrial Electroorganic Chemistry D. E. Danly and C. J. H. King	1285
32. Electrochemical Polymerization B. Lionel Funt	1337
33. Chemically Modified Electrodes and Conducting Polymers A. F. Diaz	1363
34. Photoelectrochemistry Marye Anne Fox	1397
35. Paired Electrosynthesis Manuel M. Baizer	1421
36. Challenges and Opportunities Manuel M. Baizer	1431
AUTHOR INDEX	1439
SUBJECT INDEX	1527
