

CONTENTS

PART ONE Substituent Effects

1.0 Introduction	9
1.1 Acidity	11
1.2 Very Weak Acids	23
1.3 Substituent Constants	45
1.4 Nucleophilic Displacement Reactions	60
1.5 Carbonium Ion Reactions	84
1.6 Free Radical Reactions	148
1.7 Charge Transfer Complexes and Reactions	179
1.8 Cycloadditions	195
1.9 Rearrangements	225

PART TWO Medium Effects

2.0 Introduction	259
2.1 Some Aspects of Solvent Structure	260
2.2 Dielectric Constant	265
2.3 Dynamic Dielectric Constant	272
2.4 Relaxation Times	274
2.5 Water Structure	283
2.6 Solvent Polarity: Empirical Measures	293
2.7 Applications of Solvent Polarity Parameters	317
2.8 Aprotic Dipolar Solvents	334
2.9 Salt Effects	343
2.10 Reaction Partners	352

PART THREE Intermediates and unusual Molecules

3.0 Introduction	387
3.1 Charged Species	392
3.2 Radicals	416
References	457
Name Index	481
Subject Index	491
