

Preface xiii

Introduction 1

1 HYDROCARBONS: PARAFFINIC AND AROMATIC

1. Introduction 4

2. Reduction Reactions 6

3. Condensation Reactions 11

4. Polymerization (Addition) Reactions 12

5. Coupling Reactions 14

References 15

2 OLEFINS

1. Introduction 16

2. Elimination Reactions 18

References 22

3 ACETYLENES

1. Introduction 24

2. Elimination Reactions 25

3. Condensation Reactions 26

References 27

4 ALCOHOLS AND PHENOLS

1. Introduction 28

2. Condensation Reactions 31

3. Reduction Reactions 32

4. Rearrangement Reactions 33

References 33

5 ETHERS AND OXIDES

1. Introduction 34
 2. Condensation Reactions 36
 3. Oxidation Reactions 39
- References 40

6 HALIDES

1. Introduction 41
 2. Condensation Reactions 42
- References 48

7 ALDEHYDES

1. Introduction 49
 2. Oxidation Reactions 50
 3. Condensation Reactions 51
- References 52

8 KETONES

1. Introduction 53
 2. Oxidation Reactions 54
 3. Condensation Reactions 55
- References 57

9 CARBOXYLIC ACIDS

1. Introduction 59
 2. Oxidation Reactions 61
 3. Oxidation of Olefins 62
 4. Oxidation of Ketones and Quinones 63
 5. Bimolecular Oxidation–Reduction Reactions 66
 6. Carbonation of Organometallic Reagents 68
 7. Carboxylation of the Aromatic Nucleus 70
 8. Condensation Reactions 72
 9. Hydrolysis of Acid Derivatives 81
- References 82

10 ESTERS

1. Introduction 83
 2. Condensation Reactions 85
- References 91

11 AMIDES

1. Introduction 92
2. Dehydration of Ammonium Salts 95
3. Condensation Reactions 98
References 105

12 CYANATES, ISOCYANATES, THIOCYANATES, AND ISOTHIOCYANATES

1. Introduction 106
2. Cyanates 109
3. Isocyanates 111
4. Thiocyanates 113
5. Isothiocyanates 114
References 116

13 AMINES

1. Introduction to Condensation Reactions 118
2. Miscellaneous Condensation Reactions 123
3. Reduction Reactions 128
4. Rearrangement Reactions 132
References 134

14 HYDRAZINE DERIVATIVES, HYDRAZONES, AND HYDRAZIDES

1. Introduction 136
2. Substituted Hydrazines 140
3. Hydrazones 142
4. Hydrazides 143
References 145

15 DIAZO AND DIAZONIUM COMPOUNDS

1. Introduction 147
2. Aliphatic Diazo Compounds 148
3. Aromatic Diazonium Salts 151
References 154

16 NITRO COMPOUNDS

1. Introduction 156
2. Aliphatic Nitro Compounds 158
3. Aromatic Nitro Compounds 162
References 165

17 NITRILES (CYANIDES)

1. Introduction 166
2. Elimination Reactions 168
3. Condensation Reactions 169
- References 174

18 NIERCAPTANS, SULFIDES, AND DISULFIDES

1. Introduction 175
2. Mercaptans (Thiols) 177
3. Sulfides 179
4. Disulfides 180
- References 181

19 SULFOXIDES

1. Introduction 182
2. Oxidation Methods 182
- References 183

20 SULFONES

1. Introduction 186
2. Condensation Reactions 187
3. Oxidation Methods 187
- References 188

21 SULFONIC ACIDS

1. Introduction 189
- References 193

22 ALLENES

1. Introduction 194
- References 196

23 ORTHO ESTERS

1. Introduction 197
- References 201

24 SULFITES

1. Introduction 202
2. Condensation Reactions 203
- References 207

-
- 25 ENAMINES**
1. Introduction 208
References 210
- 26 YNAMINES**
1. Introduction 211
References 212
- 27 UREAS AND POLYUREAS**
1. Introduction 213
References 217
- 28 CARBODIIMIDES**
1. Introduction 218
References 220
- 29 N-CARBAMATES (URETHANES)**
1. Introduction 221
2. Condensation Reactions 222
References 227
- 30 O-CARBAMATES**
1. Introduction 228
2. Condensation Reactions 230
References 233
- 31 IMINES**
1. Introduction 234
References 236
- 32 AZIDES**
1. Introduction 237
References 242
- 33 AZO COMPOUNDS AND AZOXY COMPOUNDS**
1. Introduction 243
References 249
- 34 ACETALS AND KETALS**
1. Introduction 250
2. Condensation Reactions 253
References 257

35 ANHYDRIDES

1. Introduction 258
2. Condensation Reactions 259
References 266

36 MONOALKYL SULFATES

1. Introduction 267
2. Sulfation of Alcohols 269
References 272

37 AMIDINES

1. Introduction 273
2. Addition Reactions 273
References 274

38 IMIDES

1. Introduction 275
2. Condensation Reactions 275
References 277

39 OXIMES

1. Introduction 278
2. Condensation Reactions 280
References 283

40 HYDROXAMIC ACIDS

1. Introduction 284
2. Condensation Reactions 286
References 287

41 POLYMER PREPARATIONS

1. Polyesters 289
2. Polyamides 290
3. Polyurethanes 293
4. Acrylic Polymers 294
5. Acrylonitrile, Acrylamide, and N-Vinylpyrrolidone
Polymers 296
6. Vinyl Acetate Polymers 298
References 300

Appendix: Documentation of Product and Process Research and Development	303
Document 1 Record Keeping Fact Sheet (American Chemical Society)	306
Document 2 Instructions for Keeping Laboratory Records (Rohm and Haas Company)	308
Document 3 CR & D Laboratory Notebooks (Du Pont de Nemours Company)	318
Document 4 Electronic Record Keeping for Patent Purposes (American Chemical Society)	321
Name Reaction Index	325
Subject Index	327
