

CONTENTS

<i>Introduction</i>	ix
1 Reagents involved in nitrosation	1
1.1 Acidic solutions of nitrous acid	1
1.1.1 Reaction via dinitrogen trioxide	3
1.1.2 Acid-catalysed pathways	6
1.2 Nitrosyl halides	10
1.3 Nitrosyl thiocyanate	16
1.4 Nitrosyl acetate (acetyl nitrite)	18
1.5 Nitrosonium salts	19
1.6 Nitrosothiouronium ions	22
1.7 Nitrogen oxides	24
1.7.1 Dinitrogen trioxide N_2O_3	24
1.7.2 Dinitrogen tetroxide N_2O_4	25
1.7.3 Nitric oxide NO	27
1.8 Miscellaneous reagents	29
1.8.1 Nitrite ion	29
1.8.2 Fremy's salt	29
1.8.3 Nitro compounds	30
1.8.4 Inorganic nitrates	31
1.8.5 Sulphur-nitroso compounds	31
References	32
2 Aliphatic and alicyclic C-nitrosation	36
2.1 Reactions of ketones	37
2.2 Reactions of other carbonyl compounds	42
2.3 Reactions of compounds containing other electron-withdrawing groups	44
2.4 Additions to alkenes	45
2.4.1 Nitrosyl halides	45
2.4.2 Nitrosyl carboxylates	48
2.4.3 Nitrogen oxides	49
2.4.4 Other nitrosating agents	51

2.5 Nitrosation of alkanes	52
References	55
3 Aromatic C-nitrosation	58
3.1 Products	59
3.2 Reaction mechanisms	63
3.3 Nitrous-acid-catalysed nitration	70
References	74
4 N-Nitrosation	77
4.1 Primary amines	77
4.1.1 Products	77
4.1.2 Kinetics	83
4.1.3 Diazotisation in non-aqueous solvents	93
4.1.4 Diazotisation of heterocyclic amines	94
4.2 Secondary amines	95
4.3 Tertiary amines	98
4.4 Amides	101
4.5 Other nitrogen-containing compounds	104
4.5.1 Ammonia	104
4.5.2 Hydrazoic acid	105
4.5.3 Hydroxylamines	106
4.5.4 Hydrazines	107
4.5.5 Sulphamic acid	108
References	109
5 N-Nitrosamines	113
5.1 Rearrangement of aromatic N-nitrosamines (the Fischer–Hepp rearrangement)	113
5.2 Other internal nitroso group rearrangements involving nitrosamines	125
5.3 Nitrosamines as nitrosating agents	128
5.3.1 N—N Heterolytic cleavage with direct transfer of the nitroso group	128
5.3.2 N—N Heterolytic cleavage with indirect transfer of the nitroso group	136
5.3.3 N—N Homolytic cleavage with indirect transfer of the nitroso group	139
5.4 Carcinogenic behaviour of nitrosamines	141
References	145

6	O-Nitrosation and alkyl nitrites	150
6.1	Nitrosation of alcohols	150
6.2	Nitrosation of ascorbic acid	156
6.3	Nitrosation of carboxylic acids	157
6.4	Nitrosation of hydrogen peroxide	160
6.5	Reactions of alkyl nitrites	161
6.5.1	Hydrolysis of alkyl nitrites	162
6.5.2	Nitrosation by alkyl nitrites	163
6.5.3	The Barton reaction and related reactions	169
	References	170
7	S-Nitrosation	173
7.1	Nitrosation of thiols	173
7.2	Thionitrites	180
7.3	Nitrosation of sulphides	182
7.4	Nitrosation of thiocarbonyl compounds	183
7.5	Nitrosation of sulphinic acids	186
7.6	Nitrosation of thiosulphate ion	188
7.7	Nitrosation of thiocyanate ion	189
7.8	Nitrosation of bisulphite ion	191
	References	192
8	Nitrosation involving metal complexes	195
8.1	Nitrosation of nucleophiles coordinated to metals	196
8.1.1	Coordinated azide	196
8.1.2	Coordinated ammonia	197
8.1.3	Coordinated amines	198
8.1.4	Coordinated hydroxylamine	199
8.1.5	O-Nitrosation	199
8.1.6	C-Nitrosation	200
8.2	Metal nitrosyls as electrophilic nitrosating agents	200
8.2.1	Synthesis	201
8.2.2	Nitroprusside (pentacyanonitrosylferrate II) $\text{Fe}(\text{CN})_5\text{NO}^{2-}$	201
8.2.3	Iron–sulphur cluster nitrosyls	206
8.2.4	Ruthenium nitrosyls	207
8.2.5	Other metal nitrosyls	208
	References	209
