

# CONTENTS

Preface .....	xi
<b>, 1. Latex Particle Nucleation and Growth</b> R. M. Fitch	<b>1</b>
<b>2. Latex Particle Stabilization</b> .....	<b>31</b>
<b>3. Well-Characterized Monodisperse Polystyrene Latexes as     Model Colloids</b> .....	<b>61</b>
J. W. Vanderhoff	
<b>4. Characterization of Latex Particles by Light Scattering</b> .....	<b>85</b>
R. L. Rowell and J. R. Ford	
<b>5. The Molecular Weight Distributions of Emulsion Polymers</b> .....	<b>105</b>
D. H. Napper, G. Lichti, and R. G. Gilbert	
<b>6. On the Optimal Reactor Type and Operation for Continuous Emulsion Polymerization</b> .....	<b>121</b>
M. Nomura and M. Harada	
<b>7. Emulsifier-Free Emulsion Copolymerization of Styrene with Acrylamide and Its Derivatives</b> .....	<b>145</b>
H. Kawaguchi, Y. Sugi, and Y. Ohtsuka	
<b>8. Polyelectrolyte-Stabilized Latices</b> .....	<b>157</b>
R. Buscall and T. Corner	
<b>9. Mechanical and Chemical Stability of Polymer Latices</b> .....	<b>171</b>
D. C. Blackley	
<b>10. Stabilization in Nonaqueous Radical Dispersion Polymerization with AB Block Copolymers of Polystyrene and Poly(dimethyl siloxane)</b> ..	<b>189</b>
J. V. Dawkins, G. Taylor, S. P. Baker, R. W. R. Collett, and J. S. Higgins	
<b>11. The Formation of Coagulum in Emulsion Polymerization</b> .....	<b>199</b>
J. W. Vanderhoff	
<b>12. Effect of Spray Drying Parameters on Polyvinyl Chloride Resin Particle Size Distribution and Plastisol Rheology</b> .....	<b>209</b>
D. J. Hoffmann and P. M. Saffron	
<b>13. Surfactant Interactions in Polyvinyl Acetate and Poly(vinyl acetate–butyl acrylate) Latexes</b> .....	<b>225</b>
B. R. Vijayendran, T. Bone, and C. Gajria	
<b>14. Rapid Density Gradient Centrifugation of Polymer Latices</b> .....	<b>239</b>
H. Lange	

15.	The Relationship Between the Electrophoretic Mobility and the Adsorption of Ions on Polystyrene Latex . . . . .	<b>251</b>
	C. M. Ma, F. J. Micale, M. S. El-Aasser, and J. W. Vanderhoff	
16.	Techniques for Measuring Particle Swelling of Carboxylic Emulsion Polymers . . . . .	<b>263</b>
	D. R. Bassett, E. J. Derderian, J. E. Johnston, T. B. MacRury	
17.	Light Scattering Studies of the Internal Structure of Emulsion Polymer Particles . . . . .	<b>279</b>
	J. R. Ford, R. L. Rowell, and D. R. Bassett	
<b>18.</b>	<b>Preparation and Characterization of Alkali-Swellable Carboxylated Latexes</b> . . . . .	<b>291</b>
	S. Nishida, M. S. El-Aasser, A. Klein, and J. W. Vanderhoff	
19.	Emulsion Polymerization Kinetics: Chain Entanglements and Glassy-State Transition . . . . .	<b>315</b>
	B. Harris, A. E. Hamielec, and L. Marten	
20.	Diffusion-Controlled Kinetics in the Emulsion Polymerization of Styrene <b>and</b> Methyl <b>Methacrylate</b> . . . . .	<b>327</b>
	D. C. Sundberg, J. Y. Hsieh, S. K. Soh, and R. F. Baldus	
21.	Polymerization Kinetics by Precision Densimetry . . . . .	<b>345</b>
	K. J. Abbey	
22.	The Effect of Nonreactive Additives on the Kinetics of Emulsion Polymerization . . . . .	<b>357</b>
	A. R. M. Azad, R. M. Fitch, and M. Nomura	
23.	Nonuniform Emulsion Polymers: Process Description and Polymer Properties . . . . .	<b>371</b>
	D. R. Bassett and K. L. Hoy	
<b>24.</b>	<b>Nonuniform Emulsion Polymers: Carbon-13 NMR Spectroscopy</b> . . . . .	<b>389</b>
	J. E. Johnston, D. R. Bassett, and T. B. MacRury	
25.	Morphology of Two-Stage Latex Particles: Polystyrene and Styrene-Butadiene Copolymer Pair Systems , . . . . .	<b>405</b>
	D. I. Lee	
26.	New Design for Producing Constant-Composition Copolymers in Emulsion Polymerization: Comparison with Other Processes . . . . .	<b>415</b>
	A. Guyot, J. Guillot, C. Pichot, and L. R. Guerrero	
27.	Theory of Compartmentalized Free-Radical Polymerization Reactions	<b>437</b>
	D. C. Blackley	
28.	A Reinvestigation of Vinyl Acetate <b>Emulsion</b> Polymerization: Isotope Effect . . . . .	<b>455</b>
	M. H. Litt and K. H. S. Chang	
29.	Catalysis of Thermal Initiation of Styrene Emulsion Polymerization by Emulsifiers . . . . .	<b>471</b>
	Z. F. M. Said, S. A. Hassan, and A. S. Dunn	
<b>30.</b>	<b>Latex Seed Particle Growth at High Surfactant Surface Coverage</b> . . . . .	<b>483</b>
	J. R. Erickson and R. J. Seidewand	

31.	On-Line Monitoring of Emulsion Polymerization Reactor Dynamics	505
	F. J. Schork and W. H. Ray	
32.	Control of <b>Particle Size Distribution</b> Through <b>Emulsifier</b> Monitoring Based on Rate of Conversion	515
	J. L. Gordon and K. R. Weidner	
33.	A Simulation Study on the Use of a Dead-Time Compensation Algorithm for Closed-Loop Conversion Control of Continuous Emulsion Polymerization Reactors	533
	K. W. Leffew and P. B. Deshpande	
34.	Experimental Study of the Seeded Polymerization of Vinyl Acetate in a Tube	567
	C. K. Lee and T. H. Forsyth	
	Index	579
