

CONTENTS

I.	General Survey of Polymerizations of Heterocyclic and Carbonyl Compounds.	1
A.	Introduction	1
B.	Polymerization of Heteroatomic Unsaturated Compounds.	3
1.	Polymerizable Heteroatomic Unsaturated Compounds.	3
2.	Polymerizability of Unsaturated Compounds.	8
C.	Polymerization of Heterocyclic Compounds.	13
1.	Polymerizable Heterocyclic Compounds.	13
2.	Polymerizability of Cyclic Compounds.	15
3.	Polymerizability of Bridged Bicyclic Compounds.	26
D.	Structural Aspects of Polyethers.	30
1.	Polymers of Heteroatomic Unsaturated Compounds.	30
2.	Polymers of Cyclic Oxides.	34
	Bibliography.	40
II.	Polymerization of Aldehydes.	43
4.	Introduction.	43
1.	History of Research and Recent Developments.	43
2.	The Mode of Polymerization Reactions.	44
B.	Polymerization to Cyclic Oligomers.	45
C.	Polymerization of Formaldehyde.	48
1.	Types of Polymerization Reactions.	48
2.	Condensation Polymerization of Formaldehyde.	50
3.	Addition Polymerization of Anhydrous Formaldehyde.	56
4.	Recent Developments of Formaldehyde Polymerization.	59
5.	Radiation-Induced Polymerization.	70
6.	Aldol-Type Condensation of Formaldehyde.	72
D.	Polymerization of Acetaldehyde.	77
1.	Freezing Polymerization.	77
2.	Cationic Polymerization.	88
3.	Adsorption Polymerization.	89
4.	Stereoregular Polymerization.	94
5.	Stereoblock Polymerization.	104
6.	Radiation Polymerization.	107
7.	Polyaldolization of Acetaldehyde.	109
E.	Polymerizations of Higher Aldehydes, Halogenated Aldehydes and Dialdehydes.	112
1.	Polymerizations of Higher Aldehydes.	112
2.	Polymerizations of Halogenated Aldehydes.	114
3.	Polymerization of Dialdehyde.	115
F.	Copolymerization of Aldehydes.	116
G.	Polymerizations of Ketones and Other Carbonyl Compounds.	116
1.	Polymerizations of Acetone and Monobromoacetone.	116
	Bibliography.	118

III. Polymerization of Alkylene Oxides.....	125
A. A General Discussion of the Polymerization of Alkylene Oxides.....	125
1. Historical.....	125
2. Structure of Alkylene Oxide.....	127
3. Mechanism of Ring Opening Reaction of Alkylene Oxide.....	129
4. Polymerization Mechanisms.....	130
B. Stepwise Anionic Polymerization.....	133
1. Principles and Procedures.....	133
2. Kinetic Study.....	135
3. Copolymerization by Stepwise Polymerization.....	142
4. End Groups of Polypropylene Glycol Prepared with Alkali Catalysts.....	144
5. Polymerization of Alkylene Oxide by Solid Alkali Catalysts.....	147
C. Polymerization by Cationic Mechanisms.....	147
D. Coordinated Anionic Polymerization.....	155
1. Introduction to Coordinate Anionic Polymerization.....	155
2. Description of Catalytic Systems.....	159
3. Polymerization by the Binary Systems of Acidic Oxides (Alumina or Silica-Alumina) and Organometallic Compound.....	172
4. Polymerization by Organometallic Compounds in the Presence of Water or Active Hydrogen Compounds.....	181
5. Mechanism of Coordinate Polymerization.....	187
F. Polymerization of Miscellaneous Epoxy Compounds.....	193
1. Introduction.....	193
2. Polymerization of <i>l</i> -Propylene Oxide.....	196
3. Polymerization of Isobutylene Oxide.....	197
4. Polymerization of Styrene Oxide and Butadiene Monoxide.....	197
5. Polymerizations of Glycidyl Ethers.....	198
6. Fluorinated Epoxides.....	200
7. Polymerization of Symmetrical Disubstituted Epoxides.....	201
8. Polymerizations of Di-epoxides.....	202
G. Radical Polymerization of Alkylene Oxides.....	202
Bibliography.....	204
IV. Polymerization of Oxacyclobutane and Its Derivatives.....	209
A. Introduction.....	209
B. Mechanism of the Polymerization of Oxacyclobutane.....	210
C. Polymerization Procedure for 3,3-Bis(chloromethyl)oxacyclobutane.....	214
1. Polymerization Catalyst, Solvent, and Temperature.....	214
2. Polymerization Apparatus and Flowsheet.....	217
D. Various Substituted Oxacyclobutanes.....	220
E. Copolymerizations of Oxacyclobutanes.....	223
Bibliography.....	224
V. Polymerizations of Tetrahydrofuran and 1,4-Epoxy cyclohexane.....	225
A. Introduction.....	225
B. Catalysts and Mechanism for Polymerization of Tetrahydrofuran.....	226
Bibliography.....	235

VI.	Polymerization of Cyclic Formals	237
A.	Introduction	237
B.	Polymerizability of Cyclic Formals	237
C.	Polymerization of 1,3-Dioxolane	238
D.	Polymerizations of Seven-Membered Cyclic Formals and Higher Homologs	241
E.	Polymerization of Trioxane	242
	Bibliography	245
VII.	Copolymerizations of Aldehydes and of Cyclic Oxides	247
A.	Introduction	247
B.	Copolymerizations of Aldehydes and of Cyclic Oxides	248
1.	Copolymerizations of Aldehyde with Olefinic or Vinyl Compounds	249
2.	Copolymerizations of Alkylene Oxides with Olefins or Vinyl Compounds	251
3.	Copolymerizations of Oxacyclobutane with Olefins or Vinyl Compounds	252
4.	Copolymerizations of Tetrahydrofuran with Olefins or Vinyl Compounds	252
5.	Copolymerizations of Cyclic Formals or Trioxane with Olefins or Vinyl Compounds	252
6.	Copolymerization of Aldehyde with Alkylene Oxide	253
7.	Copolymerization of Aldehyde with Oxacyclobutane	253
8.	Copolymerization of Aldehyde with Tetrahydrofuran	253
9.	Copolymerization of Aldehyde with Cyclic Formal	254
10.	Copolymerization of Oxacyclobutane with Alkylene Oxide	254
11.	Copolymerization of Alkylene Oxide with Tetrahydrofuran	254
12.	Copolymerization of Alkylene Oxide with Cyclic Formals	255
13.	Copolymerization of Oxacyclobutanes with Tetrahydrofuran	255
14.	Copolymerization of Oxacyclobutanes with Cyclic Formal	255
15.	Copolymerization of Tetrahydrofuran with Cyclic Formal	256
	Bibliography	256
VIII.	Properties and Applications of Polyethers	257
A.	Introduction	257
B.	Degradation and Stabilization of Polyformaldehyde	260
1.	Decomposition Reactions of Polyformaldehyde	260
2.	Stabilization of Polyformaldehyde	263
C.	Properties of Polyformaldehyde	270
1.	Introduction	270
2.	Properties of the Classical Polymers of Formaldehyde	270
3.	Properties of Thermally Stable Polymers of Formaldehyde	274
D.	Properties of Polymers of Acetaldehyde and Other Higher Aldehydes	280
1.	Polyacetaldehyde	280
2.	Properties of Higher Aldehydes and Halogenated Aldehydes	284
E.	Polyethylene Oxide	286
1.	Degradation and Stabilization	286
2.	Properties and Applications of Polyethylene Oxide of Low and Medium Molecular Weights	288

3.	Properties and Applications of Polyethylene Oxide of High Molecular Weight.	290
F.	Polymers of Propylene Oxide and Other Alkylene Oxides.	297
1.	Degradation and Stabilization.	297
2.	Crystallinity and Crystal Structure.	298
3.	Mechanical Properties.	302
G.	Polymers of Oxacyclobutane and Derivatives.	302
1.	Stability and Stabilization.	302
2.	Solubility and Water Absorption.	304
3.	Physical and Mechanical Properties.	304
H.	Miscellaneous Polyethers.	306
1.	Polytetrahydrofuran.	306
2.	Poly-1,3-dioxolane.	306
3.	Polymer and Copolymer of Trioxane.	307
	Bibliography.	308
IX.	Tabulated Examples of Patents.	311
X.	Appendix (Developments during 1961 and 1962).	401
	Author Index.	459
	Subject Index.	472
	Patent Index.	480
