

## Contents

---

<b>Poly-3,3-bis(chloromethyl)oxetane</b> . . . . .	1
Sodium Carboxymethylcellulose . . . . .	3
<b>Poly-<math>\epsilon</math>-caprolactam</b> . . . . .	7
Polymerization of Acrylamide to <b>Poly-<math>\beta</math>-alanine</b> . . . . .	12
Polyhydroxymethylene Films via <b>Poly(vinylene carbonate)</b> . . . . .	15
Propylene Sulfur Dioxide Copolymer . . . . .	21
Poly-p-phenylene . . . . .	23
Polymerization of Acrylamide in the Crystalline State . . . . .	25
Stereopolymerizations of Isobutyl Vinyl Ether . . . . .	27
High Density Polyethylene . . . . .	33
<b>trans-1,4-Polybutadiene</b> by Rhodium Salt Catalysis in Emulsion . . . . .	39
<b>cis-1,4-Polybutadiene</b> by Cobalt-Aluminum-Water Catalysis . . . . .	42
<b>cis-1,4-Polyisoprene</b> by Aluminum-Titanium Coordination Catalysis . . . . .	50
<b>trans-1,4-Polyisoprene</b> by Aluminum-Titanium-Vanadium Catalysis . . . . .	53
Emulsion Copolymerization of Butadiene and Styrene . . . . .	57
Emulsion Copolymerization of Butadiene and <b>Acrylonitrile</b> . . . . .	63
<b>Butyl Rubber</b> . . . . .	67
Chlorinated Butyl Rubber . . . . .	70
Polycyclopentadiene by Solution Polymerization with <b>Cationic</b> Catalysis . . . . .	74
Polyacrylonitrile from a Slurry Polymerization . . . . .	78

Calcium Oxide as an Initiator for <b>Acrylonitrile</b>	
Polymerization . . . . .	81
Graft Copolymers of Acrylamide on <b>Poly(vinyl alcohol)</b> .	84
Free Radical Telechelic Polystyrene with Amine End Groups	87
Polyphosphonitrilic Chloride. . . . .	91
<b>Poly[1,3-bis(p-carboxyphenoxy) propane anhydride]</b> . .	95
Polynorbornene . . . . .	100
Suspension Polymerization of Vinyl Chloride .	103
Thermosetting Acrylic Polymer. .	106
Diels-Alder Polymer of 2,5-Dimethyl-3,4-diphenylcyclo- pentadieneone <b>Dimer</b> and N,N'-4,4'-(3,3'-Dimethylbi- phenyl)- <b>bis-maleimide</b> . . . . .	110
Poly-p-xylylidene . . . . .	114
Index . . . . .	119
