

CONTENTS

Preface	ix
1. Production and Properties of 2-Cyano-1,3-butadiene Homo- and Copolymers	1
E. Müller, R. Mayer-Mader, and K. Dinges	
2. Terpolymers of Tetrafluoroethylene, Perfluoro(methyl vinyl ether), and Certain Cure Site Monomers	13
G. H. Kalb, A. A. Khan, R. W. Quarles, and A. L. Barney	
3. Novel Heat Resistant Plastics from Hydrogenation of Styrene Polymers	27
J. F. Pendelton, D. F. Hoeg, and E. P. Goldberg	
4. Segmented Polyester Thermoplastic Elastomers	39
W. K. Witsiepe	
5. Synthesis and Properties of Imide and Isocyanurate-Linked Fluorocarbon Polymers	61
J. A. Webster, J. M. Butler, and T. J. Morrow	
6. Properties of Polyphenylene Sulfide Coatings	80
H. W. Hill, Jr., and J. T. Edmonds, Jr.	
7. Polymerization of Cyclic Bis(arylene tetrasulfides)	92
N. A. Hiatt	
8. Poly(thiol esters)	105
H. G. Bühner and H-G. Elias	
9. Heat-Resistant Polyarylsulfone Exhibiting Improved Flow during Processing	131
R. J. Cornell	
10. Polymerization by Opening of Small Carbon Rings	141
C. P. Pinazzi, J. C. Brosse, A. Pleurdeau, J. Brossas, G. Legeay, and J. Cattiaux	
11. Polymerization of Pivalolactone	175
N. R. Mayne	
12. Radiation-Induced Copolymerization of Hexafluoroacetone with α -Olefins	190
Y. Tabata, W. Ito, K. Oshima, and Y. Yamamoto	
13. Donor Acceptor Complexes in Copolymerization. XXXI. Alternating Copolymer Graft Copolymers. VI. Synthesis in the Absence and Presence of Complexing Agents	209
N. G. Gaylord	

14. New Block Copolymers from Macroradicals	230
R. B. Seymour, P. D. Kincaid, and D. R. Owen	
15. Polystyrene-Polydimethylsiloxane Multiblock Copolymers	239
J. C. Saam, A. H. Ward, and F. W. Fearon	
16. Cationic Polymerization of Cyclic Ethers Initiated by Macromolecular Dioxolenium Salts	248
Y. Yamashita	
17. Photopolymerization in the Organic Crystalline State	255
G. Wegner	
18. Photopolymerization of Urethane-Modified Methacrylates for Insulating Magnet Wire	269
E. D. Feit	
Index	279
