

# CONTENTS

PREFACE	ix
CONTENTS OF VOLUME I	xi
<b>Chapter 1. Urea, Melamine, Benzoguanamine–Aldehyde Resins (Amino Resins or Aminoplasts)</b>	
1. Introduction	2
2. Urea–Aldehyde Condensations	5
3. Melamine–Aldehyde Condensations	16
4. Benzoguanamine–Aldehyde Condensations	33
5. Miscellaneous Preparations	39
References	39
<b>Chapter 2. Phenol–Aldehyde Condensations</b>	
1. Introduction	43
2. Condensation of <b>Phenol</b> with Aldehydes	46
3. Miscellaneous Preparations and Applications	69
References	70
<b>Chapter 3. Epoxy Resins</b>	
1. Introduction	75
2. Condensation–Elimination Reactions	79
3. Oxidation Reactions	90
4. Free Radical Reactions	91
5. Curing–Polymerization Reactions of Epoxy Compounds and Resins	95
6. Miscellaneous Methods	108
References	109
<b>Chapter 4. Silicone Resins (Polyorganosiloxanes or Silicones)</b>	
1. Introduction	114
2. Polyorganosiloxanes	120

3. Miscellaneous Silicone Resin Preparations and Compositions	136
References	137
<b>Chapter 5. Alkyd Resins</b>	
1. Introduction	140
2. Unmodified Alkyds	146
3. Modified Alkyds	162
4. Alkyds Modified with Vinyl Monomers	165
5. Alkyds Modified with Other Thermosetting Resins	166
6. Miscellaneous Alkyd Preparations	167
References	167
<b>Chapter 6. Polyacetals and Poly(vinyl acetals)</b>	
1. Introduction	172
2. Polyacetals from Formaldehyde	175
3. Polyacetals from Substituted Aldehydes	180
4. Polyacetals with Other Functional Groups	187
5. Polyketals	194
6. Polythioacetals and Polythioketals	199
7. Poly(vinyl acetals)	204
8. Miscellaneous Preparations	210
References	210
<b>Chapter 7. Poly(vinyl ethers)</b>	
1. Introduction	214
2. Cationic Polymerization	215
3. Free-Radical Polymerization	220
4. Coordination-Catalyzed Polymerization	224
5. Miscellaneous Methods and Preparations	228
References	229
<b>Chapter 8. Poly(N-vinylpyrrolidone)</b>	
1. Nomenclature and Molecular Weight Relationships	232
2. Introductory Remarks	234
3. Polymerization Procedures	237
4. Miscellaneous Preparations	259
References	260

**Chapter 9. Polymerization of Acrylic Acids and Related Compounds**

1. Introduction	265
2. Polymer Preparations	271
3. Polymerization of <b>Itaconic</b> Acid	295
4. Polymerization of Salts of the Acrylic Acids	297
5. Miscellaneous Preparations	302
References	302

**Chapter 10. Poly(vinyl chloride)**

1. Introduction	307
2. Bulk Polymerization	318
3. Suspension Polymerization	331
4. Emulsion Polymerization	344
5. <b>Solution</b> Polymerization	355
6. Radiation-Initiated Polymerization	357
7. Polymerization with Organometallic Initiators	358
8. Miscellaneous	360
References	361

<b>AUTHOR INDEX</b>	371
<b>SUBJECT INDEX</b>	391
