Syntheses with Acetoacetaldehyde

WALTER FRANKE AND RICHARD KRAFT, IN COLLABORATION WITH KURT KOSSWIG

Acetoacetaldehyde	1
Synthesis of Derivatives	1
Syntheses in the Aliphatic Series	8
Ring-closure Syntheses	12
Reaction of Intermediates	21
References	25

Preparation of Peptides and Ureas Using Reactive Amides or Imides

STEFAN GOLDSCHMIDT AND H. L. KRAUSS

Introduction	31
Synthesis Through Carbonic Acid Imides (Isocyanate Method)	32
Synthesis with Imides and Amides of P ³⁺ and P ⁶⁺ Acids (Phosphorazo- and Phosphite Ester Methods)	37
Supplement	48
Summary	49
References	49

The Preparation of Long-Chain Carboxylic Acids from 1,3-Cyclohexanediones

HERMANN STETTER

Introduction	51
Methods	52
Preparation of Straight-Chain Monocarboxylic Acids	78
Preparation of Dicarboxylic Acids	79
Preparation of Branched-Chain Mono-, Di-, and Polycarboxylic Acids	82
Preparation of Hydroxy and Amino Acids	86
Ring Opening of Monosubstituted 1,3-Cyclohexanediones with Nitrous Acid and with Aryldiazonium Salts	89
Methods of H. Lettré and A. Jahn	92
Experimental Examples	93
References	97

Ethyl 2-Cyclopentanonecarboxylate and Its Importance in Syntheses

ROLAND MAYER

Preparation	101
Physical Properties	102
Enol	102
Condensation with Halides	103
Cleavage to Ketones and Acids	109
Reduction	111
Cyanohydrins	113
The Grignard and Reformatsky Reactions	114
Enol Hydroxyl Exchange with Halogen	114
Replacement of the Carbonyl Oxygen by Sulfur	115
Condensation with Amines	116
Condensation with Phenols	118
Direct Condensations	119
Reaction at Carbon-3	121
Experimental Examples	121
Prospect	125
References	125

Ketene in Preparative Organic Chemistry

G. QUADBECK

Introduction	133
General Properties	133
Reactions	135
Examples of Experiments	152
References	156

**Preparative and Analytical Importance of Phosphines
and Related Compounds**

L. HORNER AND H. HOFFMANN

Preparation of Quaternary Compounds	163
Phosphines as Selective Reducing Agents	173
Derivatives of Tertiary Phosphines of Apparent Higher Valence	184
The Reactivity of Tertiary Arsines (also Stibine and Bismuthine)	192
Preparation of Phosphines	193
Procedures	202
References	208

Reduction of Carbonyl Compounds with Complex Hydrides

HELMUT HÖRMANN

Theoretical Interpretation	213
Examples	217

Supplement	221
References	224

Alkylation of Aromatic Amines

R. STROH, J. EBERSBERGER, H. HABERLAND AND W. HAHN

Ring Alkylation of Aromatic Amines	227
Alkylation of Nitrogen Heterocycles	243
N-Alkylation of Aromatic Amines	246
Reaction Mechanisms	248
Summary	251
References	252

Chemical Synthesis of Intermediates of Carbohydrate Metabolism

HERMANN O. L. FISCHER

Glucose-6-Phosphate	254
D-Glyceraldehyde-3-Phosphate	256
Dihydroxyacetone Phosphate	258
Hydroxypyruvic Acid Phosphate	260
L(-)- α -Glycerophosphate	262
D-Glyceric Acid-2-Phosphate (2-Phosphoglyceric Acid)	263
n-Glyceric Acid-3-Phosphate (3-Phosphoglyceric Acid)	267
Phosphoenol Pyruvic Acid (Phosphoryl-enol Pyruvic Acid)	268
D-Erythrose-4-Phosphate	269
References	275

Amidomethylation

H. HELLMANN

Definition and Importance of Amidomethylation	277
Amidomethylation with N-Hydroxymethylamides	277
Amidomethylation with N-Halomethylcarboxamides	285
Amidomethylation with N-Dialkylaminomethylcarboxamides and Their Quaternary Salts	287
Summary and Outlook	295
Experimental	297
References	301

Selective Catalytic Oxidations with Noble Metal Catalysts

K. HEYNS AND H. PAULSEN

General Statements	303
Oxidation of Primary Hydroxyl Groups	312
Oxidation of Secondary Hydroxyl Groups	321
Procedures	327
References	332

Alkylation of Phenols with Alkenes

R. STROH, R. SEYDEL AND W. HAHN

Introduction	337
Ethylation of Phenols	338
Propylation of Phenols	342
Alkylations with Butylene and Isobutylene	347
Alkylation with Higher and Cyclic Alkenes	353
Properties of <i>o</i> -Alkyl Substituted Phenols	353
Mechanism of Reaction	356
Summary	357
References	358

Continuous Preparation of Phenylsodium

H. RUSCHIG, R. FUGMANN AND W. MELXNER

Examples	365
References	366

Newer Investigations on Oxidation with Lead Tetraacetate

R. CRIEGEE

Reactions with Hydroxyl Compounds	368
Reactions with CH Groups	370
Reaction at the Carbon-Carbon Double Bond	372
Reactions with Mercury Compounds	375
Investigations with Thallium (III) Acetate	376
Formation of Esters of Glycolic Acid and of Glyoxylic Acid	376
Formation of Lactones from Alkenes	378
Concluding Remarks	378
Supplement	379
Selected Preparations	383
References	386
