FOREWORD	ix

The Reactions of Sulfur with Aromatic and Aliphatic Compounds

R. WEGLER, E. KÜHLE, AND WERNER SCHÄFER

The Development of the Willgerodt Reaction	1
The Mechanism of the Willgerodt Reaction	4
Newer Views Regarding the Course of the Reaction	7
Trithiones	10
Action of Sulfur on Aliphatic Ketones in the Presence of Ammonia, under Mild Temperature Conditions (Asinger Reaction)	13
Action of Sulfur on Alkyl-Substituted Aromatic and Heterocyclic Compounds	15
Action of Sulfur on Other Compounds	28
Experimental Examples	31
References	46

The Introduction of Substituents into the Pyridine Ring

K. THOMAS AND D. JERCHEL

Behavior of Pyridine during Substitution Reactions	53
Syntheses Involving the Use of Organometallic Pyridine Compounds	60
Reactivity of Substituents in the Pyridine Ring	61
Methods of Preparation of 4-Substituted Pyridine Derivatives	62
The Use of Pyridine-N-oxides in the Preparation of Substituted Pyridines	80
Appendix	92
Experimental	95
References	99

Carbonyl-Olefin Transformation Using Triphenylphosphinemethylenes.

The Wittig Reaction

U. SCHÖLLKOPF

Introduction	111
Triphenylphosphinemethylenes	112
Mechanism of the Wittig Reaction	118
Other Reactions	138
General Experimental	140
Appendix	146
References	148

N-Bromosuccinimide, Its Properties and Reactions
The Course of Substitution

L. HORNER AND E. H. WINKELMANN

Introduction	151
General Discussion	152
Survey of the Reactivity of N-Bromosuccinimide	164
Experimental	184
Appendix	190
References	194

The Acyllactone Rearrangement; A Method for the Preparation
of Heterocyclic Ring Systems

F. KORTE AND K. H. BÜCHEL

Introduction	199
Preparative Methods	200
Special Reactions	204
Enol Content of the α -Acyllactones	223
Optical Measurements of α -Acyllactones, -thiolactones, and -lactams and Their Rearrangement Products	224
Ring-Opening Mechanism of the α -Acyl- δ -lactones	227
Mechanism of the Rearrangement	228
Limitations of the Rearrangement with Respect to the Ring Size and the Functional Groups	230
Application of the α -Acyllactone Rearrangement to Special Syntheses	231
Conclusion	233
Experimental	233
References	237

Syntheses with Acid Amides, Particularly Formamide

H. BREDERECK, R. GOMPPER, H. G. V. SCHUH, AND G. THEILIG

Introduction	241
Syntheses in the Purine and Pyrimidine Series	242
Acid Amides and <i>o</i> -Phenylenediamine	254
Formamide and Compounds Containing a —NH—CO— Grouping	255
Syntheses of Imidazoles	256
Syntheses of Oxazoles	262
Synthesis of Imidazoles and Oxazoles Using Formamidine	266
Syntheses of Pyrimidines	268
Acid Amides and Halogen Compounds	273
Formamide and Mannich-type Compounds	278
Thioformamide and Halogen Compounds	280
Synthesis of Trisformylaminomethane	282
Reactions of Trisformylaminomethane	283
Synthesis of a Few <i>s</i> -Triazine Derivatives	286

Acid Amide-Acyl Chloride Adducts and Their Use in Synthesis	288
Gas-phase Reactions with Formamide	293
Experimental	295
References	299

Organic Syntheses Using Chloramine

W. THEILACKER AND E. WEGNER

Amines from Chloramine and Organometallic Compounds	304
Unsymmetrically Substituted Hydrazines from Amines and Chloramine	307
O-Alkyl and O-Arylhydroxylamines from Chloramine and Alkoxides or Phenoxides	311
Reaction between Mercapto Compounds and Chloramine	314
Aldehyde Chlorimines	314
References	315

Preparation of Esters, Amides, and Anhydrides of Phosphoric Acid

F. CRAMER

Introduction	319
Use of Acid Chlorides. Classical Methods	319
Esters Containing Protected Groups	321
Selective Removal of Protecting Groups	323
Phosphonic Esters. Michaelis-Arbusov Reaction	324
Enol Phosphates. Perkow Reaction	326
Amides and Guanidides of Phosphoric Acid	332
Problems of the Pyrophosphate and Phosphoric Acid Diester Synthesis	334
Carbodiimide Method	336
Carbamyl Phosphates	339
Reactions of Amidophosphoric Acids	340
Keteneacylals of Phosphoric Acid	342
Imidoylphosphates, Trichloroacetonitrile Method	344
Imidazolides of Phosphoric Acid	346
Experimental	346
References	351

Aromatic Compounds from Pirylium Salts

K. DIMROTH AND K. H. WOLF

Introduction	357
Conversion of Pirylium Salts into Heterocyclic Compounds Possessing Aromatic Character	357
Conversion of Pirylium Salts into Benzene Derivatives	378
Conversion of Pirylium Salts into Azulene Derivatives	396
The Reaction Mechanism	398
Methods of Preparation of Pirylium Salts	405
Experimental	409
References	418

The Formation of the Acetylenic Bond

W. FRANKE, W. ZIEGENBEIN, AND H. MEISTER

Introduction	425
The Dehydrohalogenation of Dihalides or Haloalkenes	425
Dehalogenation and Reductive Dehalogenation Using Metals	437
Decomposition of Nitrogen-Containing Compounds	438
Miscellaneous Methods	440
By the Pyrolysis of Hydrocarbons and Other Compounds	441
Experimental	443
References	446

Syntheses Using Diazoketones

F. WEYGAND AND H. J. BESTMANN

Introduction	451
Mode of Reaction of Diazoketones	451
Preparation of Diazoketones	454
Syntheses Using Diazoketones	457
References	502
AUTHOR INDEX	509
SUBJECT INDEX	537
