

Contents

1. Introduction to Basic Concepts, 1
2. Nitration of Aromatic Compounds, 20
3. Sulfonation of Aromatic Compounds, 40
4. Acylation of Aromatic Compounds, 44
5. Halogenation of Aromatic Compounds, 58
6. Alkylation of Aromatic Compounds, 68
7. Electrophilic Substitution Reactions of Aromatic Compounds Having Sensitive Nuclei, 87
8. Ring Closure by Reactions of the Friedel-Crafts Type, 115
9. Electrophilic Reactions of Unsaturated Aliphatic Compounds, 129
10. Molecular Rearrangements Involving Electron-Deficient Carbon Atoms, 171
11. Molecular Rearrangements Involving Nitrogen and Oxygen Atoms, 191
12. Oxidation, 207
13. Nucleophilic Reactions in the Aliphatic Series, 249
14. Elimination Reactions, 291
15. Nucleophilic Displacement at the Aliphatic Trigonal Carbon Atom, 316
16. Nucleophilic Displacement in the Aromatic Series, 362
17. Nucleophilic Addition Reactions of Unsaturated Compounds, 391
18. Reactions of Organomagnesium Compounds and Similar Reagents, 444
19. Reactions of Carbonyl Compounds with Enolates and Phenolates, 478
20. Nitrogen Analogs of Carbonyl Compounds, 531
21. Reduction, 545

- 22. Reactions of Radicals, 575
 - 23. Substitution Reactions in the Aliphatic Series, 604
 - 24. Autoxidation, 617
 - 25. Reactions of Organic Halogen Compounds with Metals, 623
 - 26. Hydrogenation, Hydrogenolysis, and Dehydrogenation, 637
 - 27. Decarbonylation and Decarboxylation. 662
 - 28. Molecular Reactions, 672
- Author Index, 713
Subject Index, 729
