PREFACE	v
FOREWORD	ix
<b>Part I. Theory and Techniques</b>	<b>1</b>
1. INTRODUCTION . . . . .	3
2. ELEMENTARY THEORY . . . . .	4
Chemical Shift . . . . .	6
Proton Chemical Shifts . . . . .	7
Spin-Spin Coupling and Classification of Nuclear Groups . . . . .	9
Coupling Constants and Structure . . . . .	18
Internal Rotation . . . . .	20
Exchange Effects . . . . .	20
Relaxation Effects . . . . .	21
3. USES OF NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY	23
Identification of a Substance . . . . .	23
Reaction Kinetic Studies . . . . .	25
Fundamental Studies . . . . .	26
4. EXPERIMENTAL TECHNIQUES . . . . .	27
Instrument Design . . . . .	27
Instruments Available . . . . .	29
Preparation of Samples . . . . .	33
Solvents . . . . .	34
Reference Materials . . . . .	34
Sample Tubes . . . . .	35
Operation of Instrument . . . . .	36
Factors Determining the Quality of a Spectrum . . . . .	37
Scale Expansion . . . . .	38
Time-Averaging Computer . . . . .	41
Measurement of Chemical Shift . . . . .	41
Integration . . . . .	41
Double Resonance (Spin Decoupling) . . . . .	42
Relaxation Measurements . . . . .	43
Quantitative Analysis . . . . .	44
5. HYDROGEN BONDING	46

6. ISOTOPES OTHER THAN $^1\text{H}$	49
Fluorine ( $^{19}\text{F}$ ) . . . . .	49
Phosphorus ( $^{31}\text{P}$ ) . . . . .	49
Nitrogen ( $^{14}\text{N}$ ) . . . . .	50
Carbon ( $^{13}\text{C}$ ) . . . . .	51
7. INTERPRETATION OF A SPECTRUM	52
Examples . . . . .	53
GENERAL REFERENCES	65
Part II. Charts and Correlation Tables . . . . .	67
INDEX . . . . .	111
