<b>CHAPTER 1</b>	<b>INTRODUCTION, THEORY, AND METHODS</b>	<b>1</b>
	History of $^{13}\text{C}$ NMR, 1	
	$^{13}\text{C}$ NMR: Theory and Experiment, 3	
	Sensitivity. The NMR Experiment. Nuclear Spin Relaxation. Spin-Lattice Relaxation Mechanisms. $^{13}\text{C}$ - $^1\text{H}$ Dipole-Dipole Relaxation. The Nuclear Overhauser Effect. $^1\text{H}$ Decoupling Methods.	
	NMR Instrumentation: Second-, Third-, and Fourth-Generation NMR Spectrometers, 13	
	Fourier Transform NMR, 14	
	Instrumental Requirements for Fourier Transform $^{13}\text{C}$ NMR. Data Systems. High-Field Spectrometers.	
	State-of-the-Art $^{13}\text{C}$ NMR, 23	
<b>CHAPTER 2</b>	<b><math>^{13}\text{C}</math> NMR SPECTRAL CHARACTERISTICS</b>	<b>29</b>
	Chemical Shifts, 29	
	Steric Shifts. Chemical-Shifts. Chemical-Shift Reagents and $^{13}\text{C}$ NMR.	
	Spin-Spin Coupling Involving Carbon, 33	
	$^{13}\text{C}$ Peak Area; Integration, 36	
	Representative $^{13}\text{C}$ Spin-Lattice Relaxation Times, 41	
	Quantitative Analysis with $^{13}\text{C}$ NMR, 41	
	Organic Structural Assignments with $^{13}\text{C}$ NMR, 44	
	Problems, 45	
<b>CHAPTER 3</b>	<b>ALIPHATIC COMPOUNDS</b>	<b>50</b>
	Alkanes and Derivatives, 50	

Stereochemistry and Remote Substituent Effects: "Steric Shifts. Substituted Alkanes. Individual Substituents. Spin-Spin Coupling.

Alkenes and Derivatives, 78

Cyclics. Monosubstituted Alkenes. Allenes. Coupling.

Alkynes and Derivatives, 90

Special Topics, 95

Deuterium Isotope Effects. Solvent Effects.

## CHAPTER 4 AROMATICS

Simple Aromatics, 102

Ring-Current Effects, 103

Solvent Effects, 105

Steric Shifts, 107

Assignment of Aromatic  $^{13}\text{C}$  Spectra, 109

Substituent Effects. Spectral Assignments from Relaxation Measurements.

Polynuclear Arenes, 115

Heteroaromatics. 117

Five-Membered Heterocycles. Six-Membered Heterocycles. Polycyclic Heteroaromatics.

Coupling Constants, 125

## CHAPTER 5 ORGANIC FUNCTIONAL GROUPS

Carbonyls, 136

Substituted Ketones. Phenyl Ketones. Solvent Effects. Aliphatic Ketones. Quinones and Related Polyketones. Aldehydes. Carboxylic Acids. Esters. Anhydrides. Acid Halides. Amides. Imides. Ureas, Uracils, and Carbamates. Carbonates. Coupling.

Other Carbon-Containing Functional Groups, 159

Nitriles. Isocyanides. Oximes, Hydrazones, and Other Carbonyl Derivatives. Carbodiimides and Other Linear Carbon

Compounds. Diazo Compounds and Ketenes. Isocyanates.  
Thio- and Selenocarbonyls.

## CHAPTER 6 IONS, RADICALS, AND COMPLEXES

Carbocations, 171

$\pi$ -Delocalized Carbocations Equilibrating or Bridged  
Ions.

Carbanions, 178

Organometallics, 182

Radicals, 185

## CHAPTER 7 POLYMERS

Spectral Characteristics, 191

Conformational Sequences, 194

Quantitative Analysis of Polymers, 200

Spin Relaxation and NOE, 203

Bulk Polymer Analyses, 204

Glassy and Crystalline Polymers, 206

High-Field  $^{13}\text{C}$  NMR of Synthetic Polymers, 208

## CHAPTER 8 RELAXATION STUDIES

The NMR Experiment in the Rotating Frame of  
Reference, 211

Spin-Lattice Relaxation Mechanisms, 213

Spin-Rotation Relaxation. Chemical-Shift Anisotropy  
Relaxation. Scalar Relaxation. Dipole-Dipole Relaxation. Spin  
Relaxation in Very Large Molecules: The Extreme Narrowing  
Approximation. Carbon-13 Electron-Nuclear Relaxation.  
Separation and Identification of Relaxation Contributions.  
Cross-Correlation Effects. Experimental Measurement of  $^{13}\text{C}$

Spin-Relaxation Parameters, 223

Measurement of  $T_1$ . Measurement of Nuclear Overhauser  
Enhancements. Measurement of  $T_2$ .

Applications of Relaxation Studies, 229

Molecular Dynamics. Steric Effects on Group Rotations.  
Applications to Organic Structure Analysis. Applications for  
 $T_{1\rho}$  and  $T_2$  Measurements.

<b>CHAPTER 9</b>	<b>BIOMOLECULES</b>	<b>247</b>
	Introduction,	247
	Techniques for Biomolecules,	247
	Terpenoids and Steroids,	248
	Alkaloids,	254
	Other Natural Products,	258
	Biosynthesis,	267
	Spin Relaxation in Biopolymers,	271
	Amino Acids, Peptides, and Proteins,	273
	Amino Acids and Peptides. Proteins.	
	Carbohydrates,	279
	Nucleotides and Nucleic Acids,	287
	Deoxyribonucleic Acid	
	Lipids,	293
<b>CHAPTER 10</b>	<b>SPECIAL TECHNIQUES AND APPLICATIONS</b>	<b>304</b>
	Reaction Mechanisms,	304
	Dynamic $^{13}\text{C}$ NMR,	305
	Alternative Pulse Sequences and Excitation Modes,	308
	Two Dimensional FT $^{13}\text{C}$ NMR,	310
	$^{13}\text{C}$ in Liquid Crystals,	311
	$^{13}\text{C}$ NMR of Adsorbed Molecules,	312
	$^{13}\text{C}$ NMR of Solids,	313
	$^{13}\text{C}$ NMR of Fossil Fuels,	316
	Future Applications,	318
<b>APPENDIX</b>		<b>323</b>
<b>INDEX</b>		<b>329</b>
