

Contents

Part 1

1	Introduction to UV Spectroscopy: History and Development	1
2	Arrangement of the UV-VIS Atlas	6
2.1	Introduction	6
2.2	Schedule Arrangement of Spectra	6
2.3	Methods for the Classification of UV Spectra of Organic Compounds	9
2.3.1	The BPPS-Key	9
2.3.2	Correlation Tables	12
2.4	Presentation of the Spectra and Tabular Data in the Atlas	14
2.4.1	The Spectra	14
2.4.2	Tabulated Data	14
2.4.3	Abbreviations Used in the Atlas	15
3	Reviews on the Schedule Groups	16
3.1	A. Compounds Containing Multiply Bonded C Atoms Only	16
3.2	B. Compounds Containing C=O and C=S	21
3.3	C. Compounds Containing Multiply Bonded N Atoms	27
3.4	D. Monocyclic Aromatics	32
3.5	E. Polycyclic Aromatics	39
3.6	F. Compounds Containing Non-Benzenoid Rings	48
3.7	G and H. Heterocyclic Compounds	50
3.8	I. Derivatives of Saturated Organic Compounds	52
3.9	J. Selected Compounds of Biochemical and Clinical Interest	53
3.10	K. Inorganic Systems	57
	L. Spectrophotometric Standards	57
3.11	M. Solvents	58
4	Spectra A1/1–C9/13	65

Part 2

4	Spectra D1/1–M19	337
5	Tables A1/T1–K1/T1	1239
6	Indexes	1411
6.1	List of Spectra	1413
6.2	List of Tables	1426
6.3	Formula Index	1429
6.4	Alphabetical Index	1461
6.5	R-Index	1495
