

## CONTENTS

Foreword to the Fifth Edition . . . . .	VII
Foreword to the Fourth Edition . . . . .	X
CHAPTER 1. DEVELOPMENT, PRESENT STATE AND PROSPECTS OF ORGANIC SPOT TEST ANALYSIS . . . . .	
CHAPTER 2. SPOT TEST TECHNIQUES (by PH. W. WEST)	29
1. Introduction . . . . .	29
2. Laboratory and equipment requirements . . . . .	30
3. Working methods . . . . .	33
4. Special techniques . . . . .	52
References . . . . .	56
CHAPTER 3. PRELIMINARY (EXPLORATORY) TESTS. . . . .	58
General remarks . . . . .	58
1. Non-chemical proofs; combustion tests and examination of igni- tion residues . . . . .	60
2. Burning and pyrolysis tests . . . . .	65
3. Examination of ignition residues . . . . .	67
4. Identification of nonmetallic and metallic elements bound directly or indirectly to carbon . . . . .	72
5. Carbon . . . . .	73
6. Hydrogen . . . . .	77
7. Halogens . . . . .	80
8. Iodine . . . . .	83
9. Fluorine . . . . .	84
10. Sulfur . . . . .	87
11. Nitrogen . . . . .	90
12. Phosphorus . . . . .	96
13. Arsenic . . . . .	98
14. Antimony . . . . .	100
15. Oxygen . . . . .	101
16. Metals . . . . .	102
17. Mercury . . . . .	106
18. Tests for basic or acidic behavior . . . . .	109

19. Detection of water-soluble salts of organic nitrogen bases and alkali salts of organic acids . . . . .	121
20. Orientation tests based on redox reactions . . . . .	122
21. The Le Rosen test for aromatic compounds . . . . .	
22. Ehrlich diazo test for compounds capable of coupling . . . . .	137
23. Chloranil test after Colmant . . . . .	138
24. Fuming-off test with concentrated nitric acid. . . . .	140
25. Solubility tests . . . . .	141
References . . . . .	148

#### CHAPTER 4. DETECTION OF CHARACTERISTIC FUNCTIONAL GROUPS IN ORGANIC COMPOUNDS . . . . .

1. Nitroso compounds . . . . .	153
2. <i>p</i> -Nitroso-aromatic amines . . . . .	158
3. <i>o</i> -Nitroso-phenols . . . . .	159
4. Nitro compounds . . . . .	160
5. Nitrites and nitrates . . . . .	168
6. Azoxy compounds . . . . .	170
7. Alcohols . . . . .	172
8. O- and N-methyl compounds . . . . .	179
9. N-ethyl compounds . . . . .	180
10. Ethoxy compounds . . . . .	181
11. Phenols . . . . .	182
12. 8-Hydroxyquinoline and derivatives. . . . .	188
13. <i>o</i> -Diphenolmethylene ether . . . . .	190
14. Polyhydroxyanthraquinones . . . . .	193
15. Enols . . . . .	196
16. Carbonyl compounds . . . . .	197
17. <i>o</i> -Dioxo and oxomethylene compounds . . . . .	199
18. 1,2 ( <i>o</i> )-Diketones and quinones . . . . .	205
19. Aldehydes . . . . .	208
20. $\alpha,\beta$ -Unsaturated and aromatic aldehydes. . . . .	219
21. <i>o</i> -Hydroxyaldehydes and ketones . . . . .	220
22. Methylene ketones . . . . .	223
23. Oximes and hydroxamic acids . . . . .	225
24. Thioketones and mercaptans (thiols) . . . . .	228
25. Dithiocarbamates . . . . .	234
26. Xanthates . . . . .	235
27. Carboxylic acids and their derivatives . . . . .	236
28. Aliphatic esters of fatty acids . . . . .	241
29. 1,2-Dicarboxylic acids . . . . .	243
30. Acylides, arylurethanes, and monoaryureas . . . . .	244
31. Alkyl- and aryl-acetates . . . . .	247
32. Sulfonic acids, sulfinic acids, sulfonamides, sulfones . . . . .	240

33. Sulfones . . . . .	256
34. Aliphatic and aromatic amines . . . . .	257
35. Cyclic amines . . . . .	
(a) Carbazole and derivatives . . . . .	277
(b) Pyrrole bases . . . . .	278
(c) Pyridine and derivatives . . . . .	280
36. $\alpha$ -Amino carboxylic acids . . . . .	281
37. Amino (carboxylic, sulfo, imido) acids . . . . .	285
38. Pyridine $\alpha$ -carboxylic acid and derivatives . . . . .	287
39. Acid amides and imides . . . . .	288
40. Anilides . . . . .	290
41. Guanidine and its derivatives . . . . .	291
42. Hydrazines . . . . .	
(a) Aliphatic and aromatic hydrazines . . . . .	292
(b) Arylhydrazines . . . . .	294
43. Hydrazides of carboxylic acids . . . . .	297
44. Reactive $>CH_2$ and $-NH_2$ groups . . . . .	301
45. Tertiary ring bases . . . . .	304
46. Allyl compounds . . . . .	308
47. Propenyl compounds . . . . .	310
48. Sulfoxylate compounds . . . . .	312
49. Polyhalogen compounds . . . . .	313
References . . . . .	314

CHAPTER 5. IDENTIFICATION OF INDIVIDUAL ORGANIC COMPOUNDS . . . . .	320
General remarks . . . . .	320
1. Acetylene . . . . .	323
2. Anthracene and phenanthrene . . . . .	326
3. Carbon monoxide . . . . .	327
4. Dicyanogen . . . . .	329
5. Formaldehyde . . . . .	331
6. Acetaldehyde . . . . .	334
7. Chloroform . . . . .	335
8. Bromoform . . . . .	336
9. Chloral . . . . .	336
10. Methyl alcohol . . . . .	339
11. Ethyl alcohol . . . . .	339
12. Formic acid . . . . .	340
13. Acetic acid . . . . .	342
14. Monochloroacetic acid . . . . .	344
15. Phenoxyacetic acids . . . . .	345
16. Aminoacetic acid . . . . .	346
17. Glycolic acid . . . . .	346

18. Lactic acid . . . . .	348
19. Glyceric acid . . . . .	349
20. Pyruvic acid . . . . .	350
21. Glyoxalic acid . . . . .	350
22. Oxalic acid . . . . .	353
23. Malic acid . . . . .	356
24. Tartaric acid . . . . .	357
25. Citric acid . . . . .	358
26. Ethylenediaminetetraacetic acid . . . . .	362
27. Salicylic acid (and salicylic esters) . . . . .	363
28. Aniline sulfonic acids . . . . .	365
29. Rhodizonic acid . . . . .	366
30. Anthraquinone sulfonic acids . . . . .	367
31. Sulfosalicylic acid . . . . .	368
32. Ascorbic acid (vitamin C) . . . . .	370
33. Salicylaldehyde . . . . .	374
34. Saligenin (salicyl alcohol) . . . . .	377
35. Carboic acid . . . . .	378
36. 8-Hydroxyquinoline . . . . .	378
37. Pyrocatechol . . . . .	380
38. Resorcinol . . . . .	382
39. Hydroquinone . . . . .	382
40. Hydroxyhydroquinone . . . . .	384
41. Phloroglucinol . . . . .	384
42. Pyrogallol . . . . .	385
43. Acetone . . . . .	385
44. <i>iso</i> Propyl alcohol . . . . .	386
45. Glycerol . . . . .	387
46. Carbohydrates . . . . .	389
47. Inositol . . . . .	393
48. Oxamide . . . . .	394
49. Choline . . . . .	395
50. Ethylenediamine and propylenediamine . . . . .	396
51. Phenylhydrazine . . . . .	398
52. $\alpha$ -Naphthylamine . . . . .	399
53. Tyrosine . . . . .	400
54. Proteins . . . . .	401
55. Pyridine and $\beta$ ( $\gamma$ )-Picoline . . . . .	403
56. Quinoline (differentiation from isoquinoline) . . . . .	403
57. <i>p</i> -Phenylenediamine . . . . .	405
58. Phosgene . . . . .	406
59. Urea . . . . .	407
60. Carbon disulfide . . . . .	411
61. Ephedrine . . . . .	414
62. Adrenaline . . . . .	415

63. Piperine . . . . .	416
64. Emetine and cephaeline . . . . .	417
65. Cinchonine and quinine . . . . .	418
66. Coumarin . . . . .	419
67. Morin and hydroxyflavonols . . . . .	421
68. Cupferron (neocupferron) . . . . .	423
69. Thiophen . . . . .	425
70. Furfural . . . . .	428
71. Enzymes . . . . .	429
72. Tetrachloro- <i>p</i> -benzoquinone (chloranil)	433
73. Pentachlorophenol . . . . .	435
74. Nitrosodiphenylamine . . . . .	436
75. <i>p</i> -Nitrosodimethyl(ethyl)aniline . . . . .	437
76. Dimethyl(ethyl)aniline . . . . .	437
77. Benzoyl peroxide . . . . .	438
78. Citral . . . . .	439
References . . . . .	440

#### CHAPTER 6. APPLICATION OF SPOT TESTS FOR TECHNICAL PURPOSES . . . . .

General remarks . . . . .	445
1. Detection of acid and basic compounds in organic materials. . . . .	447
2. Detection of mineral constituents in papers (differentiation of filter papers) . . . . .	449
3. Detection of organic material in dusts, soils, etc. . . . .	451
4. Identification of rongalite . . . . .	452
5. Detection of traces of sulfur in carbon disulfide, ether, organic solvents, motor fuels . . . . .	453
6. Detection of sulfide sulfur in animal charcoal and dyes . . . . .	454
7. Detection of free sulfur in solid organic products . . . . .	455
8. Detection of carbon disulfide in benzene and carbon tetrachloride. . . . .	457
9. Detection of ethanol in motor fuels, benzene, chloroform, etc. . . . .	457
10. Detection of thiophen and thiophen derivatives in benzene and toluene . . . . .	458
11. Detection of hydrogen cyanide in illuminating gas . . . . .	459
12. Detection of calcium cyanamide and urea in fertilizers and soils. . . . .	459
13. Detection of higher fatty acids in paraffin wax and vaseline . . . . .	460
14. Detection of acetic acid (acetate) in formic acid (formate) . . . . .	462
15. Distinction between acid and basic dyes . . . . .	463
16. Detection of <i>p</i> -phenylenediamine and its oxidation products in hair dyes . . . . .	463
17. Detection of dyestuffs with <i>p</i> -phenylenediamine and <i>p</i> -nitraniline structure . . . . .	464
18. Detection and differentiation of rhodamine dyes . . . . .	465

19. Differentiation of dyes with N-methyl and N-ethyl groups . . . . .	468
20. Test for hydroxytriphenylmethane dyes . . . . .	469
21. Identification of nickel dimethylglyoxime . . . . .	470
22. Detection of antimony and tin mordants in fabrics . . . . .	471
23. Detection of lead tetraethyl or lead tetraphenyl in motor fuels . . . . .	473
24. Detection of peroxides in ether and dioxan . . . . .	473
25. Detection of pyridine bases in amyl alcohol . . . . .	474
26. Detection of pyridine bases in ammonia . . . . .	474
27. Differentiation of animal and vegetable fibers . . . . .	475
28. Test for esters in mixtures of hydrocarbons . . . . .	476
29. Detection of the contamination of fabrics by mammalian urine . . . . .	476
30. Detection of oxalic acid in leather . . . . .	477
31. Detection of formaldehyde in leather . . . . .	477
32. Detection of vegetable-tanned leather . . . . .	478
33. Tests for added materials and undesirable admixtures in foods . . . . .	478
34. Detection of mineral acids and organic hydroxy acids in vinegar . . . . .	480
35. Detection of salicylic acid in foods, beverages, condiments, etc. . . . .	481
36. Test for soybean meal . . . . .	482
37. Tests for rancidity of fats and oils . . . . .	482
38. Application of spot tests in the examination of gunpowder and explosives . . . . .	484
39. Detection of urea resins . . . . .	485
40. Detection of formol plastics . . . . .	485
41. Detection of cellulose and cellulose derivatives . . . . .	486
42. Differentiation of methyl- and ethyl-cellulose . . . . .	487
43. Detection of naphthol- and naphthylamine-sulfonic acids . . . . .	487
44. Differentiation of naphthol- and naphthylamine-sulfonic acids . . . . .	489
45. Test for pharmaceutical preparations which split off formaldehyde . . . . .	491
46. Detection of antipyrine . . . . .	493
47. Detection of pyramidone (4-dimethylamino-antipyrine) . . . . .	494
48. Tests for isonicotinic acid hydrazide . . . . .	495
49. Tests for penicillin G salts . . . . .	497
50. Tests for streptomycin and dihydrostreptomycin . . . . .	498
51. Detection of chloromycetin . . . . .	499
52. Detection of aminophylline and euphylline . . . . .	500
53. Identification of guaiacol carbonate . . . . .	502
54. Identification of 8-hydroxyquinoline compounds . . . . .	503
55. Detection of salicin (populin) . . . . .	503
56. Detection of coumarin in plant material . . . . .	504
57. Detection of antimonial pharmaceutical preparations . . . . .	505
58. Detection of bismuth-bearing medicinals . . . . .	506
59. Detection of mercurial pharmaceutical preparations . . . . .	507
60. Differentiation of mercuric cyanide and mercuric oxycyanide . . . . .	508
61. Detection of calcium-bearing pharmaceutical preparations . . . . .	508

62. Detection of iodine-bearing pharmaceutical preparations . . . . .	510
References . . . . .	510
CHAPTER 7. PAPERS DEALING WITH THE USE OF SPOT REACTIONS IN ORGANIC QUALITATIVE ANALYSIS . . . . .	
CHAPTER 8. TABULAR SUMMARY of the limits of identification attained by spot tests . . . . .	517
