

CONTENTS

FOREWORD	VII
CHAPTER 1. DEVELOPMENT, PRESENT STATE AND PROSPECTS OF ORGANIC SPOT TEST ANALYSIS.	1
CHAPTER 2. SPOT TEST TECHNIQUES (by PH. W. WEST)	34
1. Introduction	34
2. Laboratory and equipment requirements.	35
3. Working methods.	38
4. Special techniques	57
References	61
CHAPTER 3. PRELIMINARY (EXPLORATORY) TESTS.	63
General remarks	63
1. Non-chemical proofs	65
2. Burning and pyrolysis tests	70
3. Examination of ignition residues	73
4. Detection of nonmetallic and metallic elements bound directly or indirectly to carbon	77
5. Carbon	77
6. Hydrogen	82
7. Halogens	83
8. Iodine	88
9. Fluorine	91
10. Sulfur	93
11. Nitrogen.	96
12. Phosphorus	99
13. Arsenic	100
14. Antimony	103
15. Oxygen	103
16. Metals	105
17. Mercury	108
18. Tests for basic or acidic behavior	110
19. Detection of water-soluble/salts of organic bases and alkali salts of organic acids	121
20. Orientation tests based on redox reactions	123
21. Le Rosen test for aromatic compounds	135

22. Pyrolysis test for aromatic compounds containing oxygen	138
23. Ehrlich diazo test for compounds capable of coupling	140
24. Chloranil test after Colmant	142
25. Fuming-off test with concentrated nitric acid	143
26. Detection of compounds which split off water or ammonia when heated to 190°	144
27. Detection of compounds which yield ammonia when pyrolyzed	146
28. Detection of compounds which split off water when heated to 180°	147
29. Test for sulfur- or halogen-containing bases	147
30. Solubility tests	148
31. Oxidizing compounds	598 (Addenda)
32. Aromatic compounds	599 (Addenda)
References	156

CHAPTER 4. DETECTION OF CHARACTERISTIC FUNCTIONAL GROUPS IN ORGANIC COMPOUNDS	159
General remarks	159
1. Groups containing nitrogen and oxygen	162
2. Nitroso compounds	164
3. <i>p</i> -Nitroso-aromatic amines	170
4. <i>o</i> -Nitroso-phenols	171
5. Nitro compounds	172
6. Nitrates, nitrites and nitramines	178
7. Azo compounds	179
8. Azoxy compounds	180
9. Compounds with $C\equiv N$ and $C=N$ groups	182
10. Aliphatic cyanides (nitriles)	183
11. N-Cyano compounds	184
12. Alcohols	184
13. O- and N-Methyl compounds	192
14. N-Ethyl compounds	193
15. Ethoxy compounds	194
16. Phenols	195
17. Phenol esters of carboxylic acids	203
18. Alkyl phenol ethers	203
19. Polyhydroxybenzenes	205
20. 8-Hydroxyquinoline and derivatives	205
21. Methylene ethers of <i>o</i> -diphenols	207
22. Polyhydroxyanthraquinones	209
23. Enols	213
24. Carbonyl compounds	213
25. <i>o</i> -Dioxo and oxomethylene compounds	215
26. 1,2- (<i>o</i> -) Diketones and quinones	221
27. Aldehydes	222

28. α,β -Unsaturated and aromatic aldehydes	233
29. <i>o</i> -Hydroxyaldehydes and -ketones	234
30. Methylene ketones	236
31. Oximes and hydroxamic acids	238
32. Thioketones and mercaptans (thiols)	242
33. Dithiocarbamates	247
34. Xanthates	249
35. Carboxylic acids and their derivatives	249
36. Aliphatic esters of carboxylic acids	254
37. 1,2-Dicarboxylic acids	256
38. Aliphatic and aromatic polycarboxylic acids and aralkyl mono- carboxylic acids	258
39. Acylides, arylurethans and monoarylureas	260
40. Alkyl and aryl acetates	261
41. Sulfonic acids, sulfinic acids, sulfonamides and sulfones	261
42. Sulfamic acids	267
43. Arsonic acids	267
44. Stibonic acids	268
45. Sulfones	269
46. Aliphatic and aromatic amines	270
47. β -Hydroxyethylamines	287
48. Cyclic amines	
(a) Carbazole and derivatives	288
(b) Pyrrole bases	288
(c) Pyridine and derivatives	290
49. α -Amino carboxylic acids	292
50. Amino (carboxylic, sulfo, imido) acids	295
51. α -Carboxylic acids of aromatic heterocyclic bases	297
52. Acid amides and imides	298
53. Amides of aromatic carboxylic and sulfonic acids	300
54. Anilides	301
55. Guanidino compounds	302
56. Hydrazines	
(a) Aliphatic and aromatic hydrazines	305
(b) Arylhydrazines	307
57. Phenylhydrazine derivatives	308
58. Hydrazides of carboxylic acids	310
59. Reactive >CH_2 and —NH_2 groups	314
60. Aromatic tertiary ring bases	317
61. Allyl compounds	321
62. Propenyl compounds	323
63. Sulfoxylate compounds	325
64. Primary halogenoalkyls	326
65. Polyhalogen compounds	327
66. 7-Dehydrosterols	328

67. Alkyl esters of non-carboxylic acids	329
68. Ethylene derivatives	330
69. Vinyl compounds	602 (Addenda)
70. Phenoxy compounds	602 (Addenda)
References	331

CHAPTER 5. IDENTIFICATION OF INDIVIDUAL ORGANIC COM- POUNDS

General remarks	337
1. Acetylene	340
2. Naphthalene	342
3. Anthracene and phenanthrene	343
4. Phenanthraquinone	345
5. Carbon monoxide	346
6. Dicyanogen	348
7. Formaldehyde	349
8. Acetaldehyde	352
9. Chloroform and bromoform	353
10. Bromoform	354
11. Chloral and bromal	355
12. Hexamethylenetetramine (urotropine, hexamine)	356
13. Methyl alcohol	357
14. Ethyl alcohol	358
15. Cyclohexanol and cyclohexanone	359
16. Nitromethane	360
17. Nitroethane	362
18. <i>p</i> -Nitraniline	362
19. Dinitrobenzenes	364
20. Hydrazobenzene	365
21. Prussic (hydrocyanic) acid	365
22. Formic acid	368
23. Acetic acid	369
24. Monochloroacetic acid	371
25. Dichloroacetic acid	373
26. Trichloro(bromo)acetic acid	374
27. Phenoxyacetic acids	374
28. Aminoacetic acid (glycine)	375
29. α -Aminopropionic acid (α -Alanine)	377
30. Glycolic acid	377
31. Lactic acid	379
32. Glyceric acid	380
33. Pyruvic acid	380
34. Glyoxalic (glyoxylic) acid	381
35. Oxalic acid	

36. Succinic acid	386
37. Malic acid	388
38. Tartaric acid	388
39. Citric acid	390
40. Mucic acid	391
41. Ethylenediaminetetraacetic acid	392
42. Salicylic acid and salicylic esters	394
43. Hippuric acid	396
44. Cinnamic acid	396
45. Aniline- and phenolsulfonic acids	397
46. Phenol- and α -naphtholsulfonic acids	398
47. Benzenesulfonic acid	398
48. Phenylsulfuric acid	399
49. Rhodizonic acid	399
50. Anthraquinonesulfonic acids	400
51. Sulfosalicylic acid	401
52. α -Naphthalenesulfonic acid	402
53. Barbituric acid (malonylurea)	403
54. Parabanic acid (oxalyurea)	404
55. Ascorbic acid (Vitamin C)	404
56. Salicylaldehyde (<i>o</i> -hydroxybenzaldehyde)	409
57. Saligenin (salicyl alcohol)	411
58. Carbolic acid and cresols	412
59. <i>o</i> - and <i>p</i> -Nitrophenol	412
60. <i>o</i> -Aminophenol (distinction from its isomers)	413
61. <i>p</i> -Aminophenol and its derivatives	413
62. 8-Hydroxyquinoline	414
63. Pyrocatechol	416
64. Resorcinol	417
65. Hydroquinone	418
66. Hydroxyhydroquinone	419
67. Phloroglucinol	420
68. Pyrogallol	420
69. Acetone	421
70. Isopropyl alcohol	421
71. Glycerol	422
72. Carbohydrates	424
73. Hexoses	427
74. Inositol	428
75. Dimethyl sulfate and methyl iodide	429
76. Oxamide	430
77. Oxanilide and oxanilic acid	433
78. Esters of oxalic acid	433
79. Oxalic acid hydrazides	434
80. Hydantoin and allantoin	435

81. Succinimide	436
82. N-Bromo(chloro)succinimide	436
83. Choline	436
84. Ethylenediamine and propylenediamine	437
85. Phenylhydrazine	438
86. α -Naphthylamine	439
87. Tyrosine	440
88. Proteins	441
89. Pyridine and $\beta(\gamma)$ -picoline	443
90. Quinoline and isoquinoline	443
91. <i>p</i> -Phenylenediamine	445
92. <i>p</i> -Aminodimethylaniline	447
93. <i>o</i> -Phenylenediamine	448
94. Phosgene	449
95. Urea	450
96. Thiourea and derivatives	453
97. Guanidine	454
98. Dicyanodiamide (cyanoguanidine)	454
99. Biguanidine	455
100. Carbon disulfide	456
101. Ephedrine	458
102. Adrenaline	460
103. Piperine	461
104. Emetine and cephaeline	462
105. Cinchonine and quinine	463
106. Codeine	464
107. Coumarin	464
108. Morin and hydroxyflavonols	466
109. Glyoxal	468
110. Diacetyl	468
111. Alloxan and alloxantin	469
112. Thiophene	472
113. Furfural	474
114. Enzymes	474
115. Tetrachloro- <i>p</i> -benzoquinone (chloranil)	478
116. Pentachlorophenol	480
117. Nitrosodiphenylamine	481
118. <i>p</i> -Nitrosodimethyl(ethyl)aniline	482
119. Dimethyl(ethyl)aniline	483
120. <i>o</i> - and <i>p</i> -Nitro(nitroso)aniline	484
121. Benzoyl peroxide	485
122. Citral	486
123. Anthraquinone and derivatives	487
124. Picrylnitromethylamine	488
125. Hexahydro-1,3,5-trinitro- <i>s</i> -triazine	489

TENTS

126. Triphenyl phosphate	490
127. Triphenyl phosphine (arsine, stibine, bismuthine)	490
128. Ethylene bromide (chloride)	491
129. Tryptophan	492
130. Diphenylamine and its derivatives	492
131. Carbon tetrachloride	606 (Addenda)
132. Ether	607 (Addenda)
133. Isatine	609 (Addenda)
References	493

CHAPTER 6. APPLICATION OF SPOT REACTIONS IN THE TESTING OF MATERIALS, EXAMINATION OF PURITY, CHARACTERIZATION OF PHARMACEUTICAL PRODUCTS, ETC.

General remarks	500
1. Detection of acid and basic compounds in organic materials	502
2. Detection of mineral constituents in papers (differentiation of filter papers)	503
3. Detection of organic material in dusts, soils, etc.	506
4. Detection of Rongalite	506
5. Detection of Chloramine T (differentiation from alkali hypochlorite).	507
6. Detection of traces of sulfur in carbon disulfide, ether, organic solvents, motor fuels	508
7. Detection of sulfide sulfur in animal charcoal and dyes	509
8. Detection of free sulfur in solid organic products	510
9. Detection of carbon disulfide in benzene and carbon tetrachloride	511
10. Detection of ethanol in motor fuels, benzene, chloroform, etc.	512
11. Detection of thiophene and thiophene derivatives in benzene and toluene	512
12. Detection of hydrogen cyanide in illuminating gas	513
13. Detection of calcium cyanamide and urea in fertilizers and soils	513
14. Detection of higher fatty acids in paraffin wax and vaseline ¹	514
15. Detection of acetic acid (acetate) in formic acid (formate)	515
16. Test for free acid in succinic and phthalic anhydrides	516
17. Distinguishing between nitrogen-bearing and nitrogen-free dyes.	516
18. Distinction between acid and basic dyes	517
19. Detection of azo dyes	517
20. Detection of azo dyes derived from aniline	519
21. Detection of dyes containing nitro groups	520
22. Detection and distinction of benzidine dyes	521
23. Detection of dyestuffs with <i>p</i> -aminophenol (naphthol) structure.	522
24. Detection of dyestuffs with anthraquinone structure	523
25. Detection of dyestuffs containing CN-groups	524

26. Detection of <i>p</i> -phenylenediamine and its oxidation products in hair dyes	525
27. Detection of dyestuffs with <i>p</i> -phenylenediamine and <i>p</i> -nitraniline structure	527
28. Detection and differentiation of rhodamine dyes	527
29. Differentiation of dyes with N-methyl and N-ethyl groups	529
30. Test for hydroxytriphenylmethane dyes	530
31. Detection of nickel dimethylglyoxime	530
32. Detection of antimony and tin mordants in fabrics	532
33. Detection of lead tetraethyl or lead tetraphenyl in motor fuels	533
34. Detection of peroxides in organic liquids	534
35. Detection of pyridine bases in amyl alcohol	535
36. Detection of pyridine bases in ammonia	535
37. Differentiation of mono- and dialkylanilines	535
38. Testing the purity of dimethyl(ethyl)aniline	536
39. Differentiation of animal and vegetable fibers	536
40. Detection of adhesives containing proteins	537
41. Detection of fats and waxes	538
42. Detection of the contamination of fabrics by mammalian urine	538
43. Detection of oxalic acid in leather	539
44. Detection of formaldehyde in leather	539
45. Detection and differentiation of organic tanning agents in leather	540
46. Tests for added materials and undesirable admixtures in foods	540
47. Detection of salts of cyclohexanesulfamic acid	542
48. Distinction of fermentation acetic acid from synthetic acetic acid	543
49. Detection of mineral acids and organic hydroxy acids in vinegar	543
50. Detection of ascorbic acid (Vitamin C) in vegetable and fruit juices	544
51. Detection of Vitamin B ₁	544
52. Detection of Vitamin B ₆	545
53. Detection of salicylic acid in foods, beverages, condiments, etc.	546
54. Test for soybean meal	547
55. Tests for rancidity of fats and oils	547
56. Examination of gunpowder and explosives	549
57. Detection of urea resins	550
58. Detection of formol plastics	550
59. Detection of melamine resins	551
60. Detection of cellulose and cellulose derivatives	551
61. Detection and differentiation of methyl- and ethyl cellulose	552
62. Test for styrene resins and styrene-containing copolymers	553
63. Test for epoxy resins	553
64. Differentiation of chlorinated rubber and neoprene	553
65. Tests for the identification of artificial fibers	554
66. Detection of nitrates of organic bases	558
67. Detection of naphthol- and naphthylamine-sulfonic acids	558
68. Differentiation of naphthol- and naphthylamine-sulfonic acids	559

69. Differentiation of H-acid and K-acid	562
70. Differentiation of isomeric naphtholsulfonic acids	563
71. Test for pharmaceutical preparations which split off formaldehyde	563
72. Detection of preparations containing tannin	566
73. Detection of salol	567
74. Test for barbiturates	567
75. Detection of antipyrine	568
76. Detection of phenacetin	568
77. Detection of pyramidone	569
78. Detection of morphine and codeine	570
79. Detection of sulfonamides (sulfa drugs)	571
80. Test for sulfadiazine	572
81. Detection of quaternizable sulfa drugs	573
82. Identification of Entobex	573
83. Tests for isonicotinic acid hydrazide	573
84. Tests for penicillin G salts	575
85. Tests for streptomycin and dihydrostreptomycin	577
86. Detection of chloromycetin	578
87. Detection of aminophylline and euphylline	579
88. Detection of piperazine in pharmaceutical preparations	580
89. Detection of guaiacol carbonate	580
90. Tests for antagonistic and anesthetic drugs containing the dimethylaminoethyl group	581
91. Detection of 8-hydroxyquinoline compounds	582
92. Detection of plant materials which can be oxidized to mucic acid	582
93. Detection of salicin (populin)	582
94. Detection of helicin	583
95. Detection of coumarin in plant material	584
96. Detection of antimonial pharmaceutical preparations	585
97. Detection of arsenic-bearing pharmaceutical preparations	586
98. Detection of bismuth-bearing medicinals	586
99. Detection of mercurial pharmaceutical preparations	587
100. Differentiation of mercuric cyanide and mercuric oxycyanide,	588
101. Detection of calcium-bearing pharmaceutical preparations	588
102. Detection of iodine-bearing pharmaceutical preparations	589
103. Detection of hippuran	589
104. Detection of alkyl phosphates used as insecticides	590
105. Test for alkali alkyl sulfates used as wetting agents	591
106. Differentiation of barbituric and thiobarbituric acid	591
107. Differentiation of <i>p</i> - and <i>o</i> -chloronitrobenzene	592
108. Detection of solvents and products with a glycolic structure	592
109. Detection of naphthalene-1,5-diisocyanate	593
110. Detection of low-boiling halogenated aliphatic hydrocarbons	593
111. Differentiation of chloroform and carbon tetrachloride	594
References	595
