

CONTENTS

Preface

INTRODUCTION

I. Objective and Scope of the Monograph	-
II. General Aspects of Gas Chromatography	2
A. Historical	2
B. Gas-solid chromatography and gas-liquid chromatography	3
C. Techniques	3
D. Operation	5
E. Terminology	6
III. Integral Parts of the Gas Chromatograph	8
A. Carrier gas	8
B. Temperature control	9
C. Columns	9
D. Detectors	12
IV. Sample Preparation and Sample Introduction Techniques	16
V. Techniques of Quantification	20
A. Peak height and peak area measurements	20
B. Determination of the amount of eluate	21
C. Quantitative GC analysis without standards	23
VI. Determination of Organic Compounds by Direct Gas Chromatography	23
References	24

2. COUPLING OF FUNCTIONAL GROUP REACTIONS WITH GAS CHROMATOGRAPHY

I. General Remarks	26
II. Techniques and Apparatus for Performing Chemical Reactions	28
A. Pyrolysis	28
B. Pre-column, on-column and post-column reactions	30
C. Subtraction methods	35
D. Peak-shifting methods	39
E. Methods requiring special reaction vessels	39
F. Derivatization methods	40
III. Reaction Gas Chromatography for Qualitative Analysis	40
IV. Reaction Gas Chromatography for Quantitative Analysis	42
References	42

3. THE OXYGEN FUNCTIONS	45
I. The Alkoxy Function	45
A. Determination of the alkyl iodide	45
B. Other methods	47
C. Experimental: Determination of alkoxy groups as alkyl iodides	47
II. The Anhydride Function	52
III. The Carbohydrate Function	53
A. Trimethylsilyl derivatives	53
B. Trifluoroacetyl derivatives	54
IV. The Carbonyl Function	55
A. Oxidation reactions	55
B. Reduction reactions	55
C. Other derivatives	56
D. Subtraction of carbonyl compounds in gas chromatography	56
E. Preparation of non-volatile derivatives and subsequent regeneration of the volatile carbonyl compounds	56
V. The Carboxyl Function	57
A. Determination by decarboxylation	57
B. Esterification of the carboxyl function for gas chromatography	60
C. Subtraction of free carboxylic acids in the gas chromatograph	63
D. Special methods	63
VI. The Epoxy Function	64
VII. The Ester Function	65
A. Hydrolytic methods	65
B. Pyrolysis of methyl esters	66
C. Methanolysis of esters	67
VIII. The Hydroxyl Function	67
A. Derivatization by silylation	67
B. Derivatization by acylation	69
C. Derivatization by diazomethylation	70
D. Subtraction and displacement methods	70
E. Special methods	70
IX. Salts	71
References	72
4. THE NITROGEN FUNCTIONS	76
I. Introduction	76
II. The Alkylamino Function	76
A. Methods of determination	76
B. Experimental: determination of alkylamino groups or mixtures containing both alkylamino and alkoxy groups	78
III. The Amino and Ammonium Functions	79
A. Methods based on nitrosation	79
B. Experimental: determination of the primary amino function by nitrous acid deamination	81
C. Determination of the amino function through derivatization	82
D. Special methods for amino acids	84
E. Analysis of quaternary ammonium compounds and amine salts	85
IV. The Azo, Azoxy and Diazo Functions	86

V. The Carbamates	88
A. Methods of determination	88
B. Experimental: determination of carbamates by reaction with alkali	88
VI. The Carbonamido and Carbonimido Functions	91
VII. The Cyano, Isocyano and Azido Functions	93
VIII. The Heterocyclic and Nitrogen Functions	93
IX. The Hydrazino and Related Functions	95
X. The Nitro and Nitroso Functions, Nitrites and Nitrates	95
XI. The Ureido and Guanidino Functions	96
References	97
5. THE SULFUR FUNCTIONS	100
I. General	100
II. The Mercapto Function	105
III. The Sulfide and Disulfide Functions	106
IV. The Sulfonamide Function	107
V. The Sulfone and Sulfoxide Functions	108
VI. The Sulfonic Function	110
A. Methods for the determination of sulfonic acids and sulfonates	110
B. Experimental determination of arylsulfonic acids by alkali fusion and measurement of the phenol formed	112
VII. Thiocarbamates and Thioesters	114
References	117
6. THE UNSATURATED FUNCTIONS	119
I. The Alkene and Alkyne Functions	119
A. Conversion to saturated compounds by hydrogenation	119
B. Subtractive methods	124
C. Methods using the hydrogenation detectors	125
D. Other methods	125
II. The Alkylidene Function: Ozonolysis	126
A. General	126
B. Methods of analysis	128
C. Experimental: determination of alkylidene groups in drying oils and in fatty acid methyl esters	130
D. Applications	133
III. Other Unsaturated Functions	135
References	136
7. MISCELLANEOUS FUNCTIONS	138
I. The Active Hydrogen Function	138
A. Methods	138
B. Experimental: determination of hydridic and of active hydrogen	142
II. The C-Methyl Function	145
III. Metal Carbonyls	146
IV. Organoarsenic Functions	146
V. Organophosphorus Functions	147

CONTENTS

VI. Organosilicon Functions	148
A. Methods	148
B. Experimental: determination of vinyl end groups in siloxane resins	152
VII. Other Organometallic Functions	155
References	157
Author Index	159
Subject Index	168
